INTRODUCTION

General Information

The Environmental Products Guide is designed to help federal civilian and military agencies identify the environmentally oriented products and services available to them through the supply system of the General Services Administration's Federal Supply Service. This Guide contains information about more than 3000 such items from GSA's supply system. In the general category of recycled content paper products alone, there are more than 1000 entries. Some of these items contain 100% postconsumer material (PM), and all applicable items meet or exceed guideline requirements established by the Environmental Protection Agency and/or addressed in Executive Order 12873.

This Guide is organized by method of supply, such as stock (GSA Supply Catalog), Special Order Program and Federal Supply Schedules, and by major commodity groupings within each method of supply. Environmental notations are provided for all of the listings to convey specific attributes. For instance, items with recycled content are so identified along with the percentage and kind of recycled content, as shown in the following example:

50% Recovered Material, Incl. 10% Postconsumer Material

This Guide is intended to be a highlighter to the GSA Supply Catalog, the Customer Supply Center Catalogs, Special Order Programs, the Federal Supply Schedules and the New Item Introductory Schedule. Item descriptions are brief, by design, since the purpose is to provide sufficient information to generate management and employee awareness of environmentally oriented products that are similar to supplies currently being used in day-to-day operations. For current detailed information on the items, refer to the publications mentioned above because various aspects, including price and availability, are subject to change.

These publications, except for the Customer Supply Center Catalogs, are available to federal agencies at no cost from the GSA Centralized Mailing List Service. Including this Guide, a number of other helpful publications are also available, such as the MUFFIN (Multi-Use File For Interagency News) Users Manual, the Customer Assistance Guide and MARKETIPS. To receive these publications, simply tear out and mail a completed, postage-paid GSA Publication Order Form found in the middle of this Guide. Customer Supply Center Catalogs may be obtained by contacting your regional Customer Supply Center directly. Information on FSS publications (as well as the order form) is also available via the Internet:

<http://pub.fss.gsa.gov>

The Guide is also available on MUFFIN. To access MUFFIN, set up the following communications parameters: 7 data bits, 1 stop bit, even parity; then set your modem to dial (202) 205-3890. When a colon appears, type "Hello GSA.Muffin". (You may need to press ENTER to get the colon.) At the master menu, select "B" for Environmental Products Guide. If you need additional information, please contact the MUFFIN Help Line at (703) 305-7200.

Internet access to the Guide is under construction and will be available in the future at the following FSS home page address:

<http://www.fss.gsa.gov>

Ordering Information

GSA Stock and Special Order Program items may be acquired by following standard FEDSTRIP/MILSTRIP requisitioning procedures, electronically through the on-line MUFFIN system, or via the Internet through GSA Advantage!TM

Federal Supply Schedule and New Item Introductory Schedule items may be acquired by sending delivery orders directly to the contractors listed on the individual schedules. (New Item Introductory Schedule contractor information is contained in this Guide.) For items offered through these schedules programs, customers are advised to review contractor literature and contact the contractor directly to obtain complete information and certification of environmental marketing claims. Schedule items are being added to GSA Advantage!TM and will also be available for ordering that way.

As indicated above, *to acquire GSA items, federal agencies only have to submit requisitions to GSA or send delivery orders to GSA contractors*, depending on the items being considered and how GSA manages them. It is important to note that *ordering agencies do not have to award contracts* and incur those associated costs when acquiring GSA items.

This Guide also contains items that are available from GSA's Customer Supply Centers. Orders for these items can be telephoned, mailed or faxed to your regional Customer Supply Center. Item availability and telephone numbers for the Customer Supply Centers are shown in the Customer Supply Center Items section.

Other Sources

Energy-Efficient Lighting

The Energy-Efficient Lighting Catalog with comprehensive information on energy-efficient lighting products is available from the Defense Supply Center Richmond (DSCR) at (800) DLA-BULB or visit their Internet home page at:

<http://www.dscr.dla.mil>

Environmental Products

The Defense Logistics Agency (DLA) has hundreds of environmental products in its supply system ranging from citrus-based degreasers and complete antifreeze recycling systems to natural resource conservation products. For a copy of their catalog, call (800) 352-2852 or visit their Internet home page at:

<http://www.dscr.dla.mil>

Basic Ordering Agreement (BOA) for Chillers

U.S. DOE and the GSA, with technical support from the Collaborative, have developed an innovative, simplified procurement process that can be used by all federal agencies to replace large chillers operating with chlorofluorocarbon (CFC) refrigerants. The new process uses a BOA and was developed with support from other federal agencies and the five largest U.S. chiller manufacturers. By using the BOA, an agency meets its responsibilities for phasing out CFC refrigerants and procuring energy-efficient, cost-effective equipment in accordance with federal mandates. All chillers purchased using the BOA must have efficiency ratings in the upper 25% of currently available models.

For further information about the BOA, contact Jane Parman, GSA, at (817) 978-2929 or by email at jane.parmar@gsa.gov.

Regulatory Influences

The range of the kinds of products and services listed in this Guide has been greatly influenced by, and in some cases is a direct result of, the various public laws and regulations that have been enacted over the years aimed at minimizing waste, conserving energy and preventing pollution. The Resource Conservation and Recovery Act (RCRA), The National Energy Policy Act (NEPA) and The Clean Air Act are but a few of the more notable ones.

A number of Executive Orders also have been issued with the same intent. Executive Order (EO) 12873, which replaced EO 12780, was signed by President Clinton and became effective on October 20, 1993. Titled "Federal Acquisition, Recycling, and Waste Prevention," it focuses federal efforts regarding recycling, waste prevention and conservation initiatives. Some of the highlights of this Order are as follows:

- The establishment of both a Federal Environmental Executive and Agency Environmental Executives to ensure federal compliance with the Order.
- The requirement for environmental factors to be considered in all phases of the acquisition process.
- The requirement for all specifications to be revised to ensure products are "environmentally preferable."
- The requirement for agencies to establish goals for solid waste prevention, recycling and the acquisition of recycled and otherwise "environmentally preferable" products.
- The application of the requirements of the Order to contractor-operated, government-owned or leased facilities.
- The establishment of an awards program in each agency, the winners of which become eligible for the newly established White House Annual Award.

As indicated above, these are just some highlights. Copies of the complete Executive Order are available from the White House Publications Office in Washington, DC, by calling (202) 395-7332.

As part of its continuing program to promote the use of recovered materials, the Environmental Protection Agency (EPA) issued the "Comprehensive Guideline for Procurement of Products Containing Recovered Materials" (CPG) (60 FR 21370) and its companion piece, the "Recovered Materials Advisory Notice" (RMAN) (60 FR 21386), on May 1, 1995. The CPG designates the following 24 recycled-content products in seven product categories for which government procuring agencies need to develop affirmative procurement programs. The RMAN provides recommendations for purchasing the products designated in the CPG. Reporting on the purchases of all of the 24 items by each agency will be required starting with FY 97.

EPA Designated Items

PAPER PRODUCTS

1. Paper and Paper Products
 - Uncoated Printing and Writing Papers
 - Reprographic Paper
 - Offset Paper
 - Tablet Paper
 - Forms Bond
 - Envelope Paper
 - Cotton Fiber Paper
 - Test and Cover Paper
 - Supercalendered
 - Machine Finish Groundwood
 - Papeteries
 - Check Safety Paper
 - Coated Printing and Writing Papers
 - Coated Printing Papers
 - Carbonless
 - Bristols
 - File Folders
 - Dyed Filling Products
 - Cards
 - Pressboard Report Covers & Binders
 - Tags and Tickets
 - Newsprint
 - Tissue Products

 - Corrugated Containers
 - Solid Fiber Boxes
 - Folding Cartons
 - Industrial Paperboard
 - Padded Mailers
 - Carrierboard
 - Brown Paper
 - Miscellaneous Paper Products
 - Tray Liners

VEHICULAR PRODUCTS

2. Engine Coolants
3. Retread Tires
4. Re-refined Lubricating Oil

CONSTRUCTION PRODUCTS

5. Structural Fiberboard
6. Laminated Paperwork
7. Carpet
8. Floor Tiles
9. Patio Blocks

10. Cement and Concrete Containing Blast Furnace Slag
11. Cement and Concrete Containing Coal Fly Ash
12. Building Insulation
13. **Shower and Restroom Dividers & Partitions**
14. **Consolidated & Reprocessed Latex Paint**

TRANSPORTATION PRODUCTS

15. Traffic Cones
16. Traffic Barriers
17. **Channelizers**
18. **Delineators**
19. **Flexible Delineators**
20. **Parking Stops**

PARK AND RECREATIONAL PRODUCTS

21. Playground Surfaces
22. Running Tracks
23. **Plastic Fencing**

LANDSCAPE PRODUCTS

24. Hydraulic Mulch
25. Yard Trimmings Compost
26. **Garden and Soaker Hoses**
27. **Lawn and Garden Edging**

NON-PAPER OFFICE PRODUCTS

28. Office Recycling Containers
29. Office Waste Receptacles
30. Plastic Desktop Accessories
31. Toner Cartridges
32. Binders
33. Plastic Trash Bags
34. **Plastic Envelopes**
35. **Printer Ribbons**

MISCELLANEOUS PRODUCTS

36. **Pallets**

UNITS OF ISSUE (U/I)

The designations shown below are used to denote the units of issue. These designations should be used on all FEDSTRIP/MILSTRIP requisitions.

AM	Ampoule	KT	Kit
AT	Assortment	LB	Pound
AY	Assembly	LG	Length
BA	Ball	LI	Liter
BD	Bundle	MC	Thousand cubic feet
BE	Bale	ME	Meal
BF	Board foot	MR	Meter

FT	Foot	SX	Stick
GL	Gallon	SY	Square yard
GP	Group	TN	Ton
GR	Gross	TO	Troy ounce
HD	Hundred	TU	Tube
HK	Hank	VI	Vial
JR	Jar	YD	Yard

The above is an updated, integrated listing of the current items designated by the Environmental Protection Agency (EPA) to be purchased by Federal activities with recycled content. In the printed version of the Guide, some of the items are listed as "EPA Proposed Designated Items"; however, in the interim period between the time the Guide was prepared and actually published, they became officially EPA Designated Items.

ITEMS

"Printed on Recycled Paper"

Four small words that make a world of difference.

GSA now offers high-quality recycled writing, text and cover weight papers in multiple colors from Crestwood Paper Co. Create handsome reports, brochures and newsletters!

Enhance your presentations, reports and other communications by using any (or all) of nine refreshingly different paper shades that make chapters and sections stand out and give covers a special look.

The artful specks of ink found in the paper are so small and uniform that they do not detract from the printing, and the final copies can be used to fax anywhere since the printed matter is extremely clear.

These Sandpiper papers are made entirely from postconsumer, non-deinked fiber. Even better, no chlorine-based bleaching agents are used in the manufacturing process. Landfill space is saved and no toxic by-products are poured into the environment, benefiting the environment without sacrificing quality.

You'll also have the freedom to use the size you want, from the standard 8-1/2 x 11" to 26 x40".

The heavier stocks give the weight and feel of authority that make an impression. The 92% opacity rating makes it possible to print on both sides, so you save money, collating, space and postage on multiple page projects.

100% Postconsumer Material

Writing Paper, 20-lb basis weight

Cleaning Cloths and Pads

Wiping Cloth

Soft, absorbent cloth contains cotton fiber, which is mixed with synthetic fabrics. Measures at least 9" wide and 200 sq in.

For general-purpose wiping, lightweight rag (2 to 7 oz/sq yd) is made from mixed color remnants, mill ends and reclaimed fabrics.

100% Recovered Material

Mixed
7920-00-148-9666 BE (contains 50 LB) \$20.08

For use where a higher-quality wiping rag is required. Lightweight rag (2 to 7 oz/sq yd) is made from sheets, shirts, pillowcases or similar materials.

White
7920-00-205-3570 BE (contains 50 LB) \$33.50

For heavy-duty wiping, rag (3 to 12 oz/sq yd) is made from mixed color remnants, mill ends and reclaimed fabrics.

Mixed
7920-00-205-1711 BE (contains 50 LB) \$17.45

Cleaning Cloth

Heavy-duty, reinforced, nonwoven wiping cloths have soft absorbent cellulose layers sandwiched between layers of rayon fibers that are not interlaced. Both the base material and the reinforcement fibers will decompose in landfills and salt water. Since the fibers are not interlaced, they will not pose a hazard to wildlife before decomposing.

Base cloth is made from recycled material.

Bio-Pro is a natural trendsetting formulation that keeps pace with today's safety and environmental regulations. This product is extracted directly from the orange peel during the production of orange juice concentrates. In nature, the citrus oil is a natural occurring insecticide that protects the fruit from harmful insects. Bio-Systems has incorporated this citrus peel extract to create a truly safe and effective shop solvent that delivers superior cleaning power. Bio-Pro is extremely effective for many different uses: parts cleaner, engine degreaser, general-purpose shop solvent, floor cleaner, tar remover or asphalt remover. Bio-Pro is 100% biodegradable, nontoxic and nonaerosol (ozone friendly); has no CFCs; is free of petroleum solvents and harmful vapors; is environmentally friendly and nonflammable; produces no harmful side effects and poses no adverse health hazards. **Bio-Systems.** Minimum order is 5 gal.

JSB-1 is an all-purpose cleaner/degreaser that replaces many products for your cleaning needs. It is highly concentrated and water soluble so a little JSB-1 goes a long way. Approved for use by the USDA. JSB-1 is nonflammable, nontoxic, nonpolluting and 100% biodegradable providing a safe solution for all your cleaning problems. Penetrates and releases grease, oil and dirt effectively. Safe on most surfaces, plastic, fabrics, metals and glass. Especially effective in steam cleaning and pressurized spray units, but it is gentle enough on skin to be used as a hand cleaner. **Diana Industries International Inc.** Minimum order is \$102.60.

HS-1000 Engine Degreaser was developed for metal surfaces, including aluminum steel, alloys and alloy mixtures. HS-1000 is blended for optimum cleaning and removal of oil, grease, dirt and grime by penetrating and releasing the soil from heavily coated surfaces. Especially effective for production wash tanks and pressurized spray units. Use HS-1000 full strength for tough jobs or dilute for cost-effectiveness. HS-1000's low VOC formula means compliance with Air Quality Management District requirements. **Diana Industries International Inc.** Minimum order is \$102.60.

Clean Crete concrete cleaner is a ready-to-use general purpose bacterial cleaner that is a natural, nonchemical dispersant and hydrocarbon digestant. It is nontoxic, biodegradable, nonpathogenic, harmless to plants and animal life and does not contain any acids, alkalines or detergents. It contains naturally occurring bacteria that eat and digest hydrocarbons using bioremediation. The bacteria convert the hydrocarbon into water and carbon dioxide, completely eliminating the contaminate. It cleans up oil, grease, fuel spills and more from concrete, soil, shop floors, equipment and anywhere else hydrocarbon contamination may occur. It can be sprayed, brushed in or be applied with scrubbing equipment and then washed down the drain.

Degrease-It is a highly concentrated industrial strength colloidal cleaner that must be mixed with water to be effective. Heat and/or agitation increases the effectiveness against fresh oil and grease. So versatile, it can be diluted. Contains rust inhibitors. Using a steam cleaner at 180° with 300 PSI it can be diluted from 100 to 300 to 1 and prolong the life of your coils. Cleans grease in lift station and aids in keeping solids in suspension. Used in water treatment plants, garages, housekeeping, kitchens, marinas, oil slick, hospitals, food plants, and pool decks. USDA A-1 Rating. It works on any surface. Compatible with water and is environmentally safe and biodegradable.

Grease Cutter is a biodegradable and environmentally safe concentrated industrial cleaner and degreaser specially formulated to clean and degrease oil, grease and soil, removes soot, resins, gums, polymers, oils, dyes and hard soap scum. Completely water soluble and safe for cleaning ferrous and nonferrous metals. Minimum foaming properties, free rinsing. Contains no chlorinated solvents and is a blend of emulsified, wetting agents and has the strong dissolving powders of a safe, nonflammable cleaning solvent. Excellent for use in scrubbing machines. Can be used full strength to remove extremely resistant soils, but for normal use dilute with hot or cold water on painted walls, glass or ceramic surfaces, floors, wax stripping and removal of rubber heel marks, conveyors, engines, ovens, deep fat fryers, greasy floors, tar and asphalt. This concentrated amber liquid with an orange fragrance forms a stable emulsion. **E.R.L. Inc.** Minimum order is \$102.60.

Green Unikleen concentrated cleaner has been specifically formulated for heavy duty industrial cleaning and degreasing to replace hazardous cleaning systems and solvents which threaten the environment as well as the health of the users and bystanders. It is an environmentally- and human-safe industrial degreaser that is pH neutral. It can be used in steam sprays, floor scrubbers, dip tanks, or any other degreasing application. This cleaner/degreaser has no fumes, no odors, no VOCs and is USDA approved. Safe on paint, wax, plastic, aluminum, chrome and any washable surface, and effectively removes any grease, oil, dirt, graphite or carbon, leaving a surgically clean surface for welding, plating or painting. Recycle used paper.

Crystal Simple Green is a concentrated biodegradable, non-toxic, non-flammable cleaner/degreaser with ZERO VOC's. Specially formulated fragrance-free, color-free solution with high rinsibility for applications including HVACR, electronics, optics and aqueous-based cleaning systems. Authorized for use in federally inspected meat and poultry plants. Replaces ozone depleting substances and provides a safer alternative to hazardous chemicals and solvents. **Sunshine Makers Inc.** Minimum order is \$102.60.

Ultra Shield Cleaner Concentrate is a high-efficiency base cleaner with a wide spectrum of cleaning applications. From automotive parts to television screens, this product is currently being used by a wide variety of institutions such as hospitals, colleges, city school districts, military facilities and state government agencies. This light blue cleaner is a nontoxic, nonpolluting concentrate base from which a vast array of individual cleaning products can be produced by diluting with water. **Ultra Shield Products International Inc.** Minimum order is \$102.60.

Citrikleen is a solvent emulsion system using a natural solvent and a multi-component surfactant system. Free of petroleum and chlorinated solvents, Citrikleen provides environmental safety plus superior cleaning performance. It will rapidly penetrate and lift the widest range of petroleum, animal and vegetable-based oil, fats and greases, which are then easily removed by water rinsing. Citrikleen is biodegradable, non-caustic and non-toxic per CFR 16.1500.3. **West Penetone Corporation.** Minimum order is \$102.60.

Citrikleen Aerosol is a biodegradable, water-rinsable cleaner/degreaser formulated with a non-petroleum, organic solvent. It also contains an emulsion/surfactant system to emulsify and saponify oils and greases for rinsing or wiping away. Citrikleen Aerosol replaces environmentally destructive products that deplete ozone and pollute the air. Citrikleen Aerosol contains no CFC's and is pleasant and easy to use. **West Penetone Corporation.** Minimum order is \$102.60.

Citrikleen HD is a biodegradable, carbon remover that is free of phenol, cresylic acid, chromate and caustic. A patented blend of natural (non-petroleum) solvent, carbon removers, corrosion inhibitors and surfactants. Citrikleen HD is specifically formulated to remove carbon soil, gelled oils and grease into easily rinsed particles leaving a clean, residue-free surface. It can be used to clean aircraft wheels, jet engine parts and ground equipments. **West Penetone Corporation.** Minimum order is \$102.60.

Penair HD-1 RTU Pump Spray is a state-of-the-art, biodegradable cleaning compound designed for aircraft surfaces and aerospace equipment. Replacing hazardous petroleum and chlorinated solvents, Penair HD-1 Pump Spray is a unique blend of natural hydrocarbon solvent, corrosion inhibitors and surfactants with added carbon removers. It is effective on the toughest aircraft soils, including exhaust carbon, hydraulic oils, boot prints and solid film lubricants. Meets requirements of MIL-C-87937B Type I. **West Penetone Corporation.** Minimum order is \$102.60.

BIODEGRADABLE ATTRIBUTE REFERENCE TABLE

Guidance for Including Environmental Attributes in Purchasing Decisions

On October 20, 1993, President Clinton signed Executive Order 12873 entitled: FEDERAL ACQUISITION, RECYCLING AND WASTE PREVENTION. Section 401 of the order requires executive agencies to consider the use of environmentally preferable products in acquisition planning for all procurement and in the evaluation and award of contracts, as appropriate.

We have also heard you, our customers, request more information on environmentally preferable products. In response to these requests, we have published the *Environmental Products Guide* and modified our Biodegradable Cleaners/Degreasers Program. We now introduce you to a new effort. GSA's Federal Supply Service, in collaboration with our Public Buildings Service and the U.S. Environmental Protection Agency, bring to you additional guidance for including environmental attributes in purchasing decisions. This guidance supplements the current Biodegradable Cleaners/Degreasers Program.

What Determines Environmental Preferability?

Defining environmental preferability requires a careful balancing of environmental factors with your expressed needs. In the table that follows, several of our vendors have provided information on seven environmental attributes for their products in addition to those required by the program (biodegradability and acute toxicity). This information is provided to you so that you can begin to include environmental attributes in your purchasing decisions. The table that follows has not been compared to any standards or benchmarks. It has been reviewed by the EPA for clarification only. No extensive technical review of the data supporting these claims has been conducted.

In deciding among products, we encourage you to review this table carefully. Each of the attributes is explained in some detail above the table.

For certain products, you will notice that information is "not reported." This means that the vendor could not or chose not to report information. This absence of information does not imply preference; it implies uncertainty. In these instances, we encour-

age you to contact the vendor directly and seek additional information.

You will also notice that we have not yet included a full array of information regarding hazardous ingredients or human health risk associated with these products. The reason is that because of their technical complexity, we are still reviewing with the EPA the best way to convey this information to you. We are, however, mindful of your information needs in this area.

We also invite you to read the product descriptions for each product and renew the material safety data sheets (MSDS) for each. The MSDSs are available through the Hazardous Material Information System (HMIS).

This is a Pilot Project

As such, we need to learn from you how we can better meet your needs. As you purchase products from this program, we will send you a questionnaire. The purpose of this questionnaire is to learn from you how well we are meeting your needs. If you are interested in talking personally with GSA or EPA staff about this pilot, please call Bob Killough with GSA at (206) 931-7527 or Conrad Flessner, Jr., with EPA at (202) 260-3918.

ALL PRODUCTS IN THIS PROGRAM COMPLY WITH OECD DEFINITION OF READY BIODEGRADABILITY (60 TO 70% BIODEGRADABLE IN 28 DAYS).

PRODUCTS DO NOT CONSTITUTE A HAZARDOUS WASTE, AS DEFINED IN 40 CFR PART 261, WHEN OFFERED FOR DISPOSAL.

Ratings by Various Attributes

1. Skin Irritation

Some ready-to-use cleaning products may contain chemicals that will cause redness or swelling of skin. If possible skin irritation is a concern, products rated as negligible (none to slight) would be most preferable for this attribute. From most preferable to least preferable, select negligible (N), slight (SL), moderate (M) or strong (ST), respectively. An "Exempt" means that all chemical components in the ready-to-use product are less than 5% by weight.

2. Food Chain Exposure

Some ready-to-use cleaning products may contain ingredients that will be taken up by smaller aquatic plants and animals and increase in concentration through the food chain as these plants and animals are consumed by larger animals. If you intend to use these products in areas where wastewa-

ter is adequately treated, this attribute may be less important as an environmental impact. If you intend to use these products in areas where wastewater treatment is less efficient, this attribute may be more important to you. We measure this attribute by recording its bioconcentration factor (BCF). Products with a BCF less than 1000 and products for which this attribute is "Exempt" are more preferable for this attribute.

3. Air Pollution Potential

Products may contain volatile organic compounds (VOCs). When these products are used, the VOCs may escape to the atmosphere and react to form smog. Smog and other atmospheric pollutants have been shown to cause irritation of the eyes, nose, throat and lungs and to cause asthma attacks. Many state and local authorities have restrictions on the use of VOCs. The numbers reported refer to the percent by weight of VOCs in the ready-to-use product. "NA" (not applicable) indicates that there are no VOCs of concern present. The lower the number, the more preferable the product. An "NA" would be most preferable for this attribute.

4. Fragrances

This attribute does not refer to natural odors that are associated with cleaning agents (e.g., a lemon odor in a citrus-based cleaner). It refers instead to fragrances that are added to the formulation to improve its odor or to mask an offensive odor. While fragrances added to a formulation have little cleaning value, they may provide aesthetic benefits important to many users. On the other hand, some people prefer products without added fragrances. A basic principle of pollution prevention is to avoid additives that are unnecessary. A "Yes" indicates that fragrances have been added; a "No" indicates that they have not been added.

5. Dyes

This attribute refers to dyes that have been added to a formulation to enhance or change the color of the product. While the addition of these dyes contributes little to the cleaning value of the product, it may be important for safety reasons. These additives may help end users differentiate between products by color or to prevent misidentification as other liquids, such as water. Again, a basic principle of pollution prevention is to avoid unnecessary additives. If dyes are present not as a safety feature but for aesthetic reasons, they may not be providing a necessary function. End users must decide what is necessary in their

specific situations. A “Yes” indicates that dyes have been added to the product; a “No” indicates that they have not been added.

6. Packaging — Reduced/Recyclable

A product’s packaging can account for a significant portion of the product’s contribution to municipal solid waste. Packaging is a large component of municipal solid waste landfills. The EPA’s recommended approach to managing solid waste is, first, reduce packaging of products and, second, recycle packaging materials. The EPA has issued guidelines for this attribute for vendors to follow. This is a two-part answer. For the first part, a “Yes” signifies that the product is packaged as a concentrate; a “No” signifies that it is not. The second part is applicable only if paper packaging is used. Paper packaging should be consistent with applicable recovered materials recommendations set forth in 60 FR 21386, 5/1/95 or draft recovered materials recommendations found in 60 FR 14190, 3/15/95. A “Yes” signifies that the vendor has met EPA guidelines for this attribute. These products would be more preferable for this attribute. An “NA” indicates that no paper packaging was used.

Because the product may be shipped as a concentrate, please also consider the next attribute.

7. Product Includes Features to Minimize Exposure to Concentrate

Although packaging a product in concentrated form may result in reduced packaging, it raises the potential that the end users of the product will be exposed to the concentrate. Exposure to the concentrate may place the end user at greater health risk than exposure to the ready-to-use product.

A “+” in this column indicates that the concentrate is part of a system by which chemicals are transferred only among closed containers. This offers less exposure potential. An “O” in the column indicates that the concentrate is premeasured and prepackaged but not designed to be transferred among closed containers. A “-” in the column indicates that the concentrate is shipped without specific exposure controls. This offers greater exposure potential. “NA” means that the product is not a concentrate.

Because the information on these attributes is intended only for purposes of relative comparison, it does not substitute for other guidance on safe product usage. The information on environmental attributes should help you decide which products to buy; it does *not* provide guidance on how to use the products. You should continue to carefully follow guidance on Material Safety Data Sheets, labels and other product-specific information to ensure safe usage.

Ask your state and local authorities about rules and regulations that may affect your purchase decisions.

Dispose of materials properly and recycle responsibly.

Environmentally preferable, biodegradable cleaners and degreasers formulated to be readily biodegradable, have low toxicity, and contain no phenolic compounds or petroleum solvents.

If you have suggestions on how to improve our service or this publication, please contact us at (206) 931-7109 or (800) 241-RAIN (7246).

Bath and Fabric Products

Toiletries

Facial Tissue

Soft, absorbent tissue comes in folded, two-ply sheets and is creped.

Comes in a pop-up dispenser. Package contains 12 boxes of 100 tissues.

5% Postconsumer Material

■ JWOD/NIB/NISH Mandatory Source

White, 66 sq in.

8540-00-793-5425 PG (contains 12 EA) \$4.64

Comes in a regular dispenser. Package contains 6 boxes of 200 tissues.

■ JWOD/NIB/NISH Mandatory Source

White, 66 sq in.

8540-00-281-8360 PG (contains 6 EA) \$4.68

Dispenser contains 50 tissues. Package contains 50 boxes of 50 tissues.

■ JWOD/NIB/NISH Mandatory Source

White, 40 sq in.

8540-00-900-4891 BX (contains 50 EA) \$37.39

Simple Green Hand Cleaner

Heavy-duty hand-cleaning gel removes grease, grime and dirt from hands. Nontoxic cleaner is safe for skin and contains lanolin to moisturize and protect.

Simple Green No. 42675.

Water-Conserving Items

6.75-oz tube

8520-01-370-4284 BX (contains 12 EA) Buy on Demand

Comes with a pump. Simple Green No. 42128.

1-gal bottles

8520-01-370-2162 BX (contains 4 EA) Buy on Demand

Paints and Accessories

Aerospace Products

Polyurethane Coating

Formulated for use on aircraft. Resistant to oils, hydraulic fluids, weather, humidity, heat and solvents. Maximum VOC 420 g/L. MIL-C-85285 Type I.

Clear finish.

Nonskid Deck Coating System

This nonskid coating system is for application to weather decks, flight decks and hangar decks of air-capable amphibious aviation and aviation ships. It can be applied to steel and aluminum by rolling (Type I and Type II) or trowelling (Type II only). Composition L is noted for use where a nonabrasive coating is needed around the steel arresting cable. The total "system" consists of a primer, a nonskid topcoat and any needed color topping. When used, the primer and nonskid topcoats shall not exceed 340 g/L VOC. The color topping shall not exceed 420 g/L VOC. These VOC levels are compliant with the EPA's Alternative Control Techniques Document on marine coatings. Please note that the color toppings are considered "Special Marking" coatings under the EPA listing, which allows for a VOC level of 490 g/L. These products are provided by government contract through direct delivery from the vendor to give you the freshest stock. Minimum order quantities are 1 kit except items with an asterisk (*), which have a minimum order quantity of 10 kits. For procurement information, contact Donna Beyer at (253) 931-7077. For technical information, contact John Stone at (253) 931-7929.

Substituting GSA's latex and water-based paints for solvent-based paints may lessen hazardous waste disposal costs.

These anticorrosive and ablative antifouling coating systems are manufactured to meet MIL-P-24647 requirements. The specification covers a variety of high grade paint systems for application to ship hulls to prevent marine biofouling and corrosion. The Type 1 products offered below are intended to polish (erode or ablate) underwater flow conditions to provide a biofouling free, smooth hull for fuel efficiency. Systems are in accordance with Naval Ships Technical Manual S9086-VD-STM-010/Chapter 631, Preservation of Ships in Service. Except for thinners, system components do not exceed 400 g/L VOC. MIL-P-24647B.

Courtaulds Coating System. Use on metal substrates, except aluminum alloys. Type I, Class 1A.

Mercury

In accordance with the 1990 EPA directive regarding mercury, GSA no longer supplies latex paint containing mercury.

Traffic Paint

This solvent-based traffic paint is suitable for application to traffic bearing surfaces such as Portland cement, concrete, bituminous pavement and plain or vitrified brick surfaces of streets, highways, bridges, tunnels, runways and parking lots. Type 1 paint is intended for small jobs such as parking lots where the paint may be applied by brush, roller or conventional sprayer. Type 2, fast dry paint, is intended for striping roads or airfields. Typical VOC 350 to 400 g/L. A-A-2886.

Type 1. Standard dry time 30 minutes with no pick-up.

Low-VOC Aerosol Paint

This is a fast-drying, general-purpose interior/exterior enamel. Use for coating small objects or areas. Apply to metal, wood, plaster, masonry, stone, glass, leather, fiber or previously painted surfaces. It is provided in an aerosol can that sprays easily without sputtering, using moderate finger pressure. Stocked items are available by pint cans. Items under contract for direct delivery are available by the box, which contains 12 pint cans. Hand shake the can for one minute before using. These aerosols comply with the VOC requirements of the Bay Air Quality Management District Regulation 8. A-A-2787.

Type I. Solvent-thinned enamel aerosols.

This corrosion-preventive compound is a solvent-dispersed material that deposits a thin, easily removable film. Solvent cutback, cold application. MIL-C-16173.

Class 1 compound is designated "High VOC," VOC may exceed 340 g/L. Class 2 compound is designated "Low VOC," VOC may not exceed 340 g/L. Grade designations and recommended uses are as follows: Grade 1: Hard-film compound for protection of metals when exposed for extended periods to outdoor weather conditions, and for general-purpose preservation indoors or outdoors, with or without cover, for domestic and overseas shipment where a dry-to-touch film is required. Grade 2: Soft-film compound for extended indoor protection of interior or exterior surfaces of machinery, instruments, etc., with or without supplementary barrier materials, and for limited periods of outdoor protection. Grade 3: Soft-film, water-displacing compound for use where water or saline solution must be displaced from corrodible surfaces. Also for parts under cover for limited periods. Not for use on metals which may be attacked by an alkaline treatment during chemical boil-out for removal, such as aluminum or magnesium alloys. Grade 4: Soft-film, water-displacing compound is for general-purpose indoor and limited outdoor preservation where handling, stacking and counting requires a tack-free coating, for protection where a transparent coating is required, and for protection of machinery and parts designated for export and where salt spray contamination is likely to occur. Grade 5: Oily film, low-pressure-steam removable, or use in place of Grade 3 compound where chemical boil-out cannot be used for removal.

Class 2 Grade 1.

Sealants

Aircraft Sealing Compound

Synthetic rubber compound is for filling and sealing gaps, slots and depressions on the exterior surface of aircraft and missiles to effect a smooth contour. MIL-S-38228 Type I.

Kit consists of base material and catalyst in a sectional cartridge. No lead formulation. Application time is two hours.

Lead-Free Items

3.5 oz in a 6.0 oz cartridge		
8030-01-386-8980	CA (contains 6 OZ)	\$23.31
		Direct Delivery

Compound has a nonlead formulation, is thixotropic and fuel resistant and has excellent adhesion to aluminum, magnesium and titanium. Application time is 1/2 hour.

Aluminum, 3.5 oz per cartridge
8030-01-386-8976 CA (contains 6 OZ) \$13.73
Direct Delivery

Grey odorless tape, used in installation of floorboard panels. This non-hazardous product makes the job easier since there is no cure time or pot life. There are no health hazards or hazardous waste that need to be disposed. Skyflex is approved for many aircraft including C-130, C-5, B-1B, F-15, C141, S-3 and H-53.

P/N GUA-1003, 1/4" width, 100' roll

Hardware

Plumbing Supplies

Shower Head

Ball-joint shower head has single-mode conical spray. Water-saving feature restricts flow rate to 3 gal per minute. A-A-240.

Shower head has a chrome-plated brass body and faceplate.

Water-Conserving Items

4510-00-202-7703 EA \$1.69

Shower head has a brass or plastic body and faceplate.

4510-00-542-4917 EA \$1.78

Storage

Hardware Bag

Self-opening bag holds hardware, nails and other items that require a high-strength bag.

5% Postconsumer Material

Natural, 4-3/4 x 2-3/4 x 7-7/8" (No. 3)
8105-00-849-9843 BE (contains 2000 EA) \$28.79
Natural, 5 x 3-1/8 x 8-3/4" (No. 5)
8105-00-849-9844 BE (contains 2000 EA) \$33.31

8105-00-849-9845 BE (contains 1000 EA) \$26.52

Hardware

Fluorescent Lamp Ballast

Energy-saving, brick-type, two-lamp ballast accommodates two 40w lamps. Rapid-start, built-in type is thermally actuated and has automatic reset. Input wattage: 87 (nominal), 90 (maximum). Class P, 60 Hz. U-L-935.

110 to 125v.

Conforms to National Appliance Energy Conservation Amendments of 1988

6250-00-892-5248 EA \$7.06

250 to 290v.

6250-00-892-5249 EA \$7.50

GSA offers vehicles using alternative fuels that burn cleaner than gasoline and improve air quality.

High to Low VOC Cross Reference

This cross-reference list offers alternate NSNs to customers who need low-VOC products. It was compiled from multiple sources which include NAVSEA and NAVSUP cross-reference lists, technical and instructional manuals from all military services, specification references and product knowledge.

VOC compliance responsibility remains, as always, with the user of the paint. In offering this list it is assumed that each paint will be used for its intended purpose (i.e., ship paint will be used on ships, not houses). VOC compliance depends upon what the paint is used for and on, and the regulatory air quality district in which the paint is applied.

If further information is required, please refer questions to GSA's Paints and Chremicals Center in Auburn, Washington. Phone (800) 241-RAIN (7246), FAX (206) 931-7544, or Internet barbara.petersen@gsa.gov.

CUSTOMER
SUPPLY CENTER
EXPRESS
DELIVERY ITEMS

For convenient ordering and quick desktop delivery of everyday office supplies, refer to your Customer Supply Center catalog. There you will find that environmentally oriented items and their attributes are highlighted in green and marked with the "chasing arrows logo" . To avoid unnecessary duplication, this section only contains those items not also found in the GSA Supply Catalog Items section.

Wall Calendar (1998)

Calendar is perforated and punched so that three months can be displayed on wall calendar board. (For use with Wall Calendar Board 7510-00-789-2455.)

Available from Washington, DC: (800) 848-8952;
Northeast: (800) 788-7155;
Palmetto: (800) 473-4484;
Chicago: (800) 262-0570;
Ft Worth/Denver: (800) 525-8027;
Stockton: (800) 786-0258;
Hickam: (808) 448-8937;
Schofield: (808) 655-1284 and
Auburn: (800) 859-4377.

50% Recovered Material, Which Includes 20% Postconsumer Material

11-5/8 x 8-7/8"
 7510-01-337-4708 PG \$3.29

Calendar Pad (1998)

Blotter-style calendar is divided into square blocks for each day.

Available from Washington, DC: (800) 848-8952;
Northeast: (800) 788-7155;
Palmetto: (800) 473-4484;
Chicago: (800) 262-0570;

SPECIAL ORDER PROGRAM ITEMS

GSA offers a wide variety of commercially available, environmentally oriented products through the Special Order Program. To learn more about these products, call the contacts listed below or use the mailing list codes to request copies of the mentioned catalogs by filling out and mailing in the attached GSA Publication Order Form.

AUTOMOTIVE PRODUCTS

Alternative Fuel Vehicles

Contact Sara Hamilton at (703) 308-4153

Federal Standards 122 (passenger autos) and 307 (light trucks), STAN program (medium and heavy trucks) and BARB program (buses). Alternative fuel vehicles, such as alcohol, electric, natural gas and propane, that are produced by vehicle manufacturers are indicated for each type of vehicle where available. Contract coverage of each type is negotiated to the maximum extent practical. Ordering and production times and quantities may be limited.

Environmental Attribute: The Energy Policy Act and Executive Order 12844 commit federal agencies to an aggressive program to acquire alternative fuel vehicles. By using alternative fuel, emissions are reduced and energy security is obtained from reduced import petroleum usage. Some Department of Energy funds are available to pay for the additional cost of these vehicles.

Automotive Fuel Economy

Ordering standards have items that cover a full variety of sizes and require a minimum fuel economy for each item. This allows the ordering agency to know the fuel economy level when they are determining a spread of vehicles to buy. Bid evaluations for passenger autos and light trucks under 3800-kg gross vehicle weight rating consider fuel economy by adding the anticipated cost of fuel to the bid price to get an evaluated price for the award.

Environmental Attribute: Each executive agency is required to meet minimum fleet average fuel economy values in their annual acquisitions. This is to ensure that federal acquisitions meet the same levels that the manufacturers are required to meet in their sales mix. Reducing fuel consumption saves resources and reduces the effect of fuel combustion in the atmosphere.

CFC-Free Vehicle Air Conditioning

All auto, truck and bus manufacturers have made the change to a new air conditioning refrigerant (R134a) that is an acceptable substitute for the CFC refrigerant with ozone depleting potential.

Environmental Attribute: Conventional CFC refrigerants are considered to be a cause of stratospheric ozone loss.

Postconsumer material is the most beneficial to the environment because if it were not recovered and reused, it would end up in a landfill or other disposal site, aggravating the existing disposal problems.

INSULATION PRODUCTS

The following products are available from GSA's Special Order Program. Prices vary with each buy.

CLEANING PRODUCTS**Commercial Cleaning Supplies**

A detailed program guide is available from the GSA Centralized Mailing List Service. Check the box for CAMP-T001 for Commercial Cleaning Supplies on the GSA Publication Order Form at the back of this catalog and send it in to request a copy.

Includes water-soluble cleaners and degreasers in both concentrated and ready-to-use forms. Products are biodegradable, nontoxic and environmentally safe.

APPLIANCES**The ^E Designation Means Energy Efficient**

Executive Order 12902 (Sec. 507) and the Energy Policy Act of 1992 (EPACT) direct all federal agencies to choose energy-using products that are among the 25% most energy-efficient products available, and at least 10% more efficient than required by federal standards. Such products must also meet the agency's requirements and be cost-effective. The General Services Administration is working with the department of Energy (DOE) to help federal buyers identify products that meet these energy-efficient procurement criteria.

Appliances listed in this Guide (refrigerator/freezers, room air conditioners and dishwashers) shown with an ^E symbol are the products that meet or exceed the energy efficiency criteria in Executive Order 12902 from the Appliances & Service Acquisition Program.

Life Cycle Costing

All single-award contract appliances (except microwave ovens) are procured using life cycle cost (LCC) procedures. The purpose of LCC is to obtain the best performance for the lowest total cost of ownership. GSA uses acquisition cost and energy consumption/efficiency as the two elements in the LCC analysis and awards to the lowest LCC. Energy efficiency is the major factor in the determination of the low LCC.

Kitchen Appliances**Dishwasher**

Domestic-use dishwasher features permanent undercover installation without power cord. Operates on 115/120v, 60-Hz power.

34" high, 25.3" deep, 23.9" wide

FEDERAL
SUPPLY
SCHEDULE
ITEMS

Refer to the Federal Supply Schedules by number to find out more about the vendors offering these environmentally oriented products. Use the schedule number to request copies of a particular schedule by filling out and mailing in the attached GSA Publication Order Form.

CLEANING PRODUCTS

Cleaning Machines and Small Parts Washers

Schedule 49 II

Automatic cleaning machines and/or small parts washers with recirculating solution systems reduce hazardous waste.

Industrial/Hazardous Waste Removal Vacuum Cleaners

Schedule 79 I B

Vacuum cleaners are designed for use in the removal of asbestos, mercury, flammable liquids and other hazardous waste and contaminants.

Sorbents—Marine and Nonmarine

Schedule 79 V

Covers a wide range of materials used in cleanup of hazardous or toxic substances such as:

Nonmarine Usage

- Nonhazardous and nontoxic organic spills (oils, hydraulic fluids, petroleum products, etc.).
- Hazardous and toxic organic spills.

Marine Spills, Nonwater Soluble

Various types of sorbent material are covered on contract in the form of pillows, pads, booms, drum covers, mats, rolls, sheets, sweeps, socks, spill kits and particulate. Recycled cellulose fiber, polypropylene, peat moss and polymer technology are some of the types of sorbent products on contract. Many are deemed "Environmentally Friendly Products."

ENERGY SAVERS

Energy-Efficient Computers

Schedule 70 I B/C

ADP processing equipment that meet the energy efficiency requirements of EPA's Energy Star Computer Program is available. Companies with products that qualify for the Energy Star Computer program can display an EPA Energy Star logo on their qualifying equipment.

Energy-Efficient Lighting Products

Schedule 62 II

Fluorescent lighting fixtures, ballasts, occupancy sensors, reflectors and other miscellaneous energy-efficient lighting products are available.

Energy Management Systems

Schedule 63 I

Energy management building systems, including components and accessories, were previously covered by the New Item Introductory Schedule.

FIREFIGHTING AND WASTE DISPOSAL VEHICLES

Firefighting and Waste Disposal Vehicles

Schedule 42 IV

Covers firefighting vehicles and trailer contracts, including a wide variety for structural, crash, hazardous materials, rescue and wildfire applications. The waste disposal contracts include a wide variety of vehicles and trailers for collection and disposal of refuse, recycled, liquid and hazardous waste. Customers may contact vendors to obtain details of the models offered to determine suitability for their application. Orders are placed by the Automotive Commodity Center.

Environmental Attribute: Many federal facilities are facing increasing environmental requirements that require these types of special-purpose vehicles.

FLOOR COVERING

Carpet, Rugs, Tiles and Cushions

Schedule 72 I A

Offers the following types of cushion made from recycled products, as well as low-emitting installation adhesives available from several carpet vendors:

- Synthetic fiber carpet cushion made from post-industrial waste (trim) from the carpet industry.
- Bonded urethane foam carpet cushion made from foam trim pieces from the automobile industry, which are glued (bonded) together to form a cushion.

Recycled Source Carpet

Contracting Officer: (703) 305-6210

Talisman Mills Inc
6000 Executive Dr
Mequon, WI 53092
(800) 482-5466

Contract Number: GS-00F-0006A

Made from 100% recycled plastic soft drink containers (Envirelon 40). Dozens of colors and custom patterns are available.

Energy-saving light bulbs are available from the Defense General Supply Center. For a copy of their catalog call toll free (800) DLA-BULB.

THE GREAT OUTDOORS

Erosion Control Fabric and Gabions

Schedule 56 IV A

Prevent erosion of soil with biodegradable and non-biodegradable erosion control fabric and gabions (wire baskets).

Park and Outdoor Equipment

Schedule 78 I C

Picnic tables and benches are made from recycled plastic. Playground safety surfacing is made from recycled materials.

MATERIALS HANDLING EQUIPMENT

Pallets

Schedule 39 II A

Pallets for storage of hazardous materials made from recycled plastic. Containment pallets.

Spill containment units for deployment and control of hazardous spills.

Oil Containment Booms

Schedule 19 I

Oil containment booms corral oil spills.

MEETING AND PRESENTATION AIDS

Trophies, Awards and Plaques

Schedule 99 VI A

Plaques are made from recycled materials.

PHOTOGRAPHIC EQUIPMENT

Silver Recovery Equipment

Schedule 67 II and III

Includes equipment used to recover silver during the processing of photographic film. Prevents silver from becoming an environmental hazard by removing it before it enters the waste stream.

MOTOR VEHICLE MAINTENANCE

Refrigerant Reclamation Systems (Automotive)

Schedule 49 I B

Offers motor vehicle and miscellaneous maintenance and specialized repair shop equipment.

OFFICE SUPPLIES

Envelopes

Schedule 75 V

All envelope styles are made from recycled paper with the following exceptions: Style 210—Color Wove, Style 604—Color Tyvek and Style 605—Color Tyvek. The more than 100 envelopes offered meet most government mailing needs. Includes all types from savings bond envelopes with windows to first class green diamond border envelopes for larger mail pieces.

Facsimile Paper

Schedule 75 I D

Offers two sources for recycled facsimile paper, including one with 50% recycled base paper.

File Folders

Schedule 75 II A

File folders are available in various colors with 10% postconsumer recovered material content.

GreenDisks

Schedule 58 V

GreenDisks are preformatted, prelabeled, repackaged, recycled computer disks. Both 3-1/2 and 5-1/4" sizes, high density and double density, formatted for DOS and Macintosh, are available.

*See also your Customer Supply Center Catalog.
Look for NSN 7045-01-392-6514.*

MARKETIPS, the MUFFIN User's Manual and several other helpful publications are available free of charge.

PACKAGING MATERIAL

Ecologically Safe Packing Material

Schedule 81 I B

American Excelsior Co

850 Ave H E
Arlington, TX 76011
(817) 640-1555

Loose-fill packing material has an Ecofoam starch base and is made from 95% cornstarch and 5% polyvinyl alcohol. Material will decompose when exposed to water.

PAINTS/COATINGS

Latex Paint

Schedule 80 VI A

Covers latex paints and primers for interior and exterior architectural use. Three gloss levels with applicable primers are available in Federal Standard 595B colors. Fifteen different local and national suppliers have contracted with GSA to place their paints on the schedule. These products are water-based, lead and chromate free, and meet architectural VOC limits of a maximum of 250 g/l.

Solvent Recycling Service

The Paints and Chemicals Center has a solvent recycling service contract with the Safety-Kleen Corp (GS-10F-8623C) that is available throughout the continental United States. All the work is done for you. Safety-Kleen's Parts Washing Service uses a closed-loop system in which they come in and service your parts washer, providing clean solvent and taking away the dirty solvent for recycling. This includes obtaining all necessary licenses, permits and the compliance with federal, state, local and municipal laws, codes and regulations pertaining to recycling. For more information, please contact Sandra Whallon at (253) 931-7062.

RECYCLING COLLECTION CONTAINERS

Recycling and Specialty Waste Receptacles

Schedule 72 VII B

Receptacles are for personal use and common work areas. Carts and large community containers and accessories can also be used.

ENVIRONMENTAL TESTING EQUIPMENT

Geophysical Instruments

Schedule 66 II Q

Covers instruments and equipment used to collect, log and analyze environmental samples and data in the areas of oceanography, meteorology (weather) and soil science. The *schedule also includes surveying, mapping and Global Positioning System (GPS) equipment and Geographic Information Systems (GIS)*.

Hazard Detection and Analysis

Schedule 66 II R

Includes water, air and noise analyzers and environmental hazard detection equipment.

RETREAD TIRES

Retread Tires

Schedule 26 I

Retread tire services under contract cover light truck and medium truck-bus, which includes cap with installation on a government-furnished casing (retread services), that meet commercial and government safety standards.

When purchasing tires, federal agencies are required to comply with EPA guidelines and Executive Order 12873, Part 4, Section 402 (b), which mandates purchase of environmentally preferable products where practicable.

Environmental Attribute: A used tire casing, after passing inspection for retreadability, has a new tread applied and is returned to service rather than being discarded as waste. The energy and raw materials used to make the tire casing portion and the tire itself, which is the majority of the tire's construction, are conserved.

The contact for the Automotive Center is Barney Brasseux (703) 305-7837.

The NSNs in this Guide are environmentally oriented items. These items may contain recycled materials, be reformulated to be less ozone depleting, be lead free or be energy or water efficient .

NEW ITEM INTRODUCTORY SCHEDULE ITEMS

The quarterly New Item Introductory Schedule lets you know the latest in innovative product introductions. This section highlights those that are environmentally oriented. To get on the mailing list for this schedule, fill out and mail in the attached GSA Publication Order Form.

ENERGY MANAGEMENT COMPONENT FOR HVAC SYSTEMS

High Capacity HVAC Energy Recovery Components

Contracting Officer: (817) 978-2998

Pentech Services Inc

6048 Cornerstone Ct. W, Ste A
San Diego, CA 92121
(619) 457-2911

Contract Number: GS-07F-7275B

Components include return air temperature sensor, data display monitor and thermistor plug-in probe.

LIGHTING FIXTURES AND ACCESSORIES

Low-Voltage Retrofit Lighting Devices

Contracting Officer: (817) 978-2998

Visual Images Inc

PO Box 257
Deerfield, IL 60015-2444
(708) 948-5777

Contract Number: GS-07F-7043B

The Halogen RetroSystem™ is a lighting solution that exceeds the energy reductions mandated by the EPCA federal legislation. The product is a cost-effective, movable, dimmable, retrofit lighting device. It reduces energy consumption and costs without sacrificing lighting requirements. The quality of display, task and general lighting improves without committing to a major capital expenditure. Costly closings of work areas are eliminated, installation is as easy as a standard light bulb. Designed as a "retrofit" replacement, it converts existing line voltage (120V) recessed can or track fixtures into low-voltage halogen (12V) MR16 movable energy efficient lighting. The powder-coated head holds a chemically strengthened glass eliminating most UV transmissions and protects against bulb breakage. The head pivots 90° and the medium base plug rotates 360°, allowing directional lighting. Product operates various MR16 lamps, 20-50w rated at 4,000 hours or higher, reducing lamp and maintenance costs. Unit has a resettable thermal protector of 18°C. UL listed 79X5.

Solar Outdoor Lighting Systems

Contracting Officer: (817) 978-2998

Solar Outdoor Lighting Inc

3131 SE Waaler St
Stuart, FL 34997
(561) 286-9616

Contract Number: GS-07F-7119B

Provides dependable, maintenance-free operation. The electricity produced by the solar panels is stored in the battery until nightfall.

Fluorescent Task Lighting

Contracting Officer: (817) 978-2998

Systematix Inc

PO Box 1056
Gulf Breeze, FL 32501
(904) 434-8528

Contract Number: GS-07F-8840D

Lighting for modular work stations includes lighting, air purification and sound masking features.

Task Lighting with Occupancy Sensors

Contracting Officer: (703) 305-7627

Garcy/SLD

209 Kirby Rd
Portland, TN 37148
(615) 325-9252

Contract Number: GS-27F-3034D

Task lighting with T-8, 265 mA triphosphor lamps, electronic ballasts and occupancy sensors to reduce consumption of electricity.

OFFICE MACHINES AND SUPPLIES

Recycled Fabric Ribbons

Contracting Officer: (212) 264-8733

Ribbon Recyclers Inc

3773 Cherry Creek Dr N #500
Denver, CO 80209
(303) 377-4695

Contract Number: GS-14F-9716C

Fabric ribbons used with computers, typewriters and all impact printers are collected and identified by the user. The used ribbons are recycled (reinked) to a "like new" quality, packaged and returned to the original user.

LUBRICATING AND FUEL DISPENSING EQUIPMENT

Power Drain Systems

Contract Specialist: (817) 978-8377

International Automotive Supplies

8350 Greensboro, Ste 1009

McLean, VA 22102

(703) 848-8940

Contract Number: GS-07F-9247D

Quick-Connect Oil Pan Drain Kit is designed to change hot engine oil quickly without removing the plug. Eliminates spills, stripped plugs and damage to oil pan sumps along with the possibility of contaminating the environment. Made for all vehicles, buses, construction equipment, farm machinery, forklifts, industrial and marine engines, radiators, reefers, fuel tanks, transmissions, etc.

Used Oil Furnaces

Contract Specialist: (817) 978-8377

Clean Burn Inc

83 S Groffdale Rd

Leola, PA 17540

(717) 656-2011

Contract Number: GS-07F-9531G

Clean Burn multi-oil furnaces comply to the latest EPA rulings regulating the on-site burning of used oil. Clean Burn recycles used oil in a safe manner without the costs or fear of liability associated with second-person collection, transportation and disposal. Burning your used oil on-site greatly reduces the cost of heating your facility.

The Battery Mat

Contracting Officer: (253) 931-7900

The Battery Mat

PO Box 3601

Winchester, VA 22601

Contract Number: GS-10F-40224

A super absorbent polypropylene needlepunch felt traps and contains acid while its powerful neutralizing agents start to work immediately to counterbalance the hazardous effects of the acid. Helps to dissolve battery acid before the acid can dissolve your car. Can be installed on all foreign and domestic cars, vans, minivans and trucks. Also suitable for agricultural equipment and marine and industrial applications.

Scotch-Brite

Contracting Officer: (253) 931-7900

3M Center

3M Center Bldg 224-4S-04

St Paul, MN 55144-1000

Contract Number: GS-10F-40230

A fiber scouring pad made from 100% recycled beverage bottles. Containing effective grease-cutting detergents, these pads outlast steel wool without painful steel splinters. All detergents used are biodegradable and phosphorous free and will not leave a rusty residue on sinks and other cleaned surfaces.

7930-01-393-6753 BX 168 PD \$23.51

Dri-Wash-N-Guard Waterless CarWash

Contracting Officer: (253) 931-7900

W.W. Marketing

206 E Wapello

Altadena, CA 91001

Contract Number: GS-10F-40134

The amazing new clean anywhere, anytime, quick and easy product that seals, cleans, polishes and protects any vehicle without water. Guaranteed to clean without scratching or damaging the paint, leaving a like-new finish. Recommended for cars, trucks, planes, boats, motorcycles, skis, metal buildings, snowmobiles, windows, mirrors, aluminum siding, jewelry, plastic signs, computers — virtually any nonporous surface!

7930-01-393-6565 BX 6 32-oz \$181.43

INSULATED WINDOWS AND GLAZINGS

Insulated Windows

Contracting Officer: (817) 978-2998

Therm-O-Lite Inc

635 S Lafayette Blvd

South Bend, IN 46601

(219) 234-4004

Contract Number: (817) 978-2998

Therm-O-Lite provides insulated windows in low E and tempered glass. Also available are windows with enclosed blinds. Unique design allows retrofit of existing windows without replacement. Upgrades the efficiency of existing windows and significantly reduces the high cost of replacement.

Window Overglazing

Contracting Officer: (817) 978-2998

Duo-Gard Industries Inc

6232 Executive Dr
Westland, MI 48185
(313) 595-7181

Contract Number: GS-07F-9190D

This translucent overglazing system consists of patented panels that retrofit over existing windows, walls and skylights for a smarter solution to old, inefficient glazing — all without sacrificing natural light, view or ventilation options. Panels are constructed of twin-walled polycarbonate structured sheet and polyethylene foam in aluminum framing. Panels have a low initial cost with a fast payback. Life cycle is 25 years.

WINDOW TREATMENTS

Window Quilt

Contracting Officer: (215) 656-3834

Northern Cross Industries

7 Technology Dr
Brattleboro, VT 05301
(800) 698-7407

Contract Number: GS-03F-7024F

Five-layer composite, tracked, movable and insulating shade with four-way seal is for windows, sliding glass doors, skylights and other applications. Reduces energy consumption for heating and cooling.

INSULATION PRODUCTS

Thermal and Acoustical Insulation

Contracting Officer: (817) 978-2998

Recycled Fibre Industries Inc

5001 N Dixie Hwy
Boca Raton, FL 33431
(561) 395-1909

Contract Number: GS-07F-9507G

Thermal and acoustical insulation has aeronautic and marine applications. HVAC duct and pipe wrap insulation, and sill gasket and frame insulation. Thermal and acoustical insulation can be used on interior walls, floors, ceilings, wall panels and hanging baffles. Marine thermal acoustical insulation can be utilized in engine rooms, state room walls, ceilings and floors. HVAC duct and pipe wrap is a high performance internal/external air duct cover material suitable for use in residential, industrial and commercial HVAC applications. Sill gasket and frame insulation is utilized as highly flexible sealing materials for open framework around door and window jambs and as thermal insulation for water seals around pipes.

THRESHOLD RAMPS

EZ Edge Threshold Ramp

Contracting Officer: (703) 305-5213

Van-Duerr Industries

426 Broadway, Ste 207
Chico, CA 95928
(800) 497-2003

Contract Number: GS-

A threshold ramp made from 100% recycled rubber provides a solution to the problem of removing threshold barriers for wheelchair access.

OUTDOOR FURNITURE

Environmental Casual Furniture

Contracting Officer: (703) 305-6634

Government Sales Associates, L.C.

PO Box 1507
Goldenrod, FL 32733
(800) 226-2640

Contract Number: GS-27F-0408G

Minimal maintenance, casual furniture for deck and patio use is made of plastic lumber from 100% postconsumer plastic containers.

PRODUCTS FROM RECYCLED MATERIAL

Speed Bumps, Wheel Stops, Wheel Chocks, Floor Mats, Patio Blocks, Interlocking Bricks, Sign Bases and Posts

Contracting Officer: (817) 978-2998

Enviroform Recycled Products Inc

287 Gambree Rd
PO Box 553
Geneva, NY 14456
(315) 789-1810

Contract Number: GS-07F-9518G

All products are made from 100% recycled tire rubber. Speed bumps provide vehicle speed reduction for safety purposes. Wheel stops establish a stopping point for vehicle parking spaces. Wheel chocks prevent a vehicle from rolling when in a stationary position. Floor mats and patio blocks provide safety and comfort in a variety of applications in both indoor and outdoor applications (daycare facilities, parks and school yards).

RECYCLING SYSTEMS

Aerosol Can Recycling Systems

Contract Specialist: (817) 978-8377

Waste Control Systems Inc

2835 Merrymans Mill Rd
Phoenix, MD 21131-1631
(410) 252-9360

Contract Number: GS-07F-7062B

This system eliminates aerosol cans from the solid hazardous waste stream and allows the steel can to be recycled.

SMOKING SHELTERS/HUTS

Air Flow Smoking Shelters

Contracting Officer: (817) 978-2998

Duo-Gard Industries Inc

C/O Federal Program Management
11166 Main St, Ste 402
Fairfax, VA 22030
(313) 207-9700

Contract Number: GS-07F-9424G

Cost-effective, long-term solution to providing a comfortable environment for smokers and the elimination of proven health risks to non-smokers. Modular, fully enclosed Air-Flo shelters combine 6063-T5 extruded aluminum framing and translucent bronze, twin-walled polycarbonate structured sheet for durability, strength and high light transmission. Shelters are flame retardant, virtually unbreakable, maintenance-free and vandal resistant.

NEW ITEM PUBLICATION

DRUM AND PAINT CAN CRUSHERS AND PACKERS

Drum Crushers

Contract Specialist: (817) 978-8377

Completely enclosed, heavy-duty, fully engineered machines reduce disposal costs by reducing waste bulk. A safety interlock prevents operation unless steel door is closed. Electrical and hydraulic components are heavy duty. Various levels of compaction force are available. Quantity breaks and accessories are available. Contact the Contract Specialist for further information.

Drum and Paint Can Crusher

Contract Specialist: (817) 978-8377

Machines crush drums, pails, cans and filters with compaction ratios of up to 15:1. Some units also pack hazardous waste inside of drums with a substantial reduction in volume and disposal cost. Other units prepare paint containers and their contents for recycling. All of these machines are available in portable or stationary models with explosion proof features.

Series DPC85 crushes 110-gal and smaller drums and compacts waste inside of drums.

Model PCC1X 3990-01-443-1122	\$8,292.13

High-tech paint can crushers built with a state-of-the-art design that is guaranteed not to warp or crack and provide balanced crushing, no matter how unbalanced the load. The crushers are available in both a mobile electric model (ME), a stationary electric model (SE) and a mobile gasoline powered model (MG). Each machine has explosion-proof controls and an interlock valve that prevents the ram from descending if hydraulics fail. The machines are also designed to prevent operation if the door is open.

Model SE 15 3990-01-431-7813	\$6,694.65
Model ME 15 3990-01-431-7801	\$7,464.15
Model MG 15 3990-01-431-7808	\$7,464.15

Machine is designed with many features yet remains simple to operate. Removable grates make the machine is easy to clean. The motor can be placed up to 30' from the unit, thereby reducing noise and eliminating combustion concerns. An interlocking valve locks the ram in place if a hydraulic line should fail. The unit will not operate with the door open. Available in three stationary models (15/4 and 4/1) and one mobil model (15/4M). The 15/4 is available with an 8-hp gasoline powered engine.

Model 15/4M 3990-01-431-7819	\$8,187.48
Model 15/4 (gas) 3990-01-431-7803	\$8,187.48
Model 15/4 3990-01-431-7811	\$7,066.06
Model 4/1 3990-01-431-7817	\$5,632.74

Roller Extraction System

Contract Specialist: (817) 978-8377

The Extractor-Pro Roller Extraction System is unique in the industry. It is designed with extra heavy-duty construction and capacity for industrial applications. The rollers on the wringer are 19" wide and are chemical-resistant. It accepts 18" pads unfolded, 3 to 4 socks simultaneously, 5 and 6" booms and some 8" booms. It has its own collection sink that fits on a closed-head 55-gal drum and is equipped with an easy guide feed/started table, offset rollers for easy feeding, a built-in anti-spill valve and a motor drive conversion option. The EPA "Waste Reduction Innovative Technology Evaluation" report shows that savings of 51-75% are possible and that the pay back period would be 2.8 to 5 weeks. Has been Air Force MEEP tested.

DISPOSAL SYSTEMS**Fluorescent Lamp Disposers**

Contract Specialist: (817) 978-8377

Lamp crushers safely dispose of 4', 8' and U-shaped fluorescent lamps while its disposable filter traps mercury vapor gases. Three models fit over a standard 55-gal steel drum. Featured is a new electronic counter controller with preset solid-state counters, a non-contacting tube sensor that registers 4' lamps as one count and 8' lamps as two counts. Gives lamp a buzzer indication when filter is exhausted and drum is full. A disposable polyurethane sleeve with elastic ends seals in dust and fumes during drum change and remains on drum for disposal. Filter capacity is 2400 and drum capacity is 600 to 900 equivalent 4' lamps.

ENERGY SYSTEMS**Exit Sign Retro-Fit Kits**

Contracting Officer: (817) 978-2998

Energy-saving LED retro-fit kits for exit signs (red stencil 6" fixtures). The LED lights are ITL tested to be used on 1.65w, last up to 100 years, are surge protected, impervious to shock and vibration and eliminate the necessity for changing lamps. There are no tools required for installation. The kit is U/L approved.

Complete Kit 9905-01-406-8438	\$22.32
227 Voltage Converter 9905-01-406-8439	\$6.37

LIGHTING FIXTURES

Fluorescent Lighting Filters

Contracting Officer: (817) 978-2998

Spectrum environmental fluorescent lighting filters are made of rose-colored polymer film. Designed to reduce glare and eyestrain caused by the harsh lighting of fluorescent lights. The filter provides the added benefit of blocking UV (ultraviolet) emissions from fluorescent lights. Available in 4 x 25' rolls and 4 and 8' sleeves (-4 and -8). Sleeves are available in 1" (T8) and 1-1/2" (T12) diameters. Series 514 (sleeves) and 614 (rolls) are designed for areas with average to above average lighting conditions. Series 574 (sleeves) and 674 (rolls) are designed for areas with below average lighting conditions.

TURF AND LAWN

Thatch Biodigest

Contracting Officer: (817) 978-2998

Non-chemical biodegradable product converts thatch into nutrient rich humus by working with naturally occurring organisms. Increases cation exchange capacity. Eliminates mechanical thatch removal, increases root depth and improves soil condition. Reduces water and fertilizer usage. Available in liquid form (LTB) and dry form (DTB).

LTB-4 (4 gal) 8720-01-429-5152	\$142.50
LTB-5 (5 gal) 8720-01-429-5156	\$167.60

Organical Fertilizer

Contracting Officer: (817) 978-2998

Organical's fertilizer is made from poultry waste using a modern proprietary procedure that results in a very high quality organic fertilizer with a clean, earth humus odor and high all-natural NPK values. The combination of high nutrient values, quick action, non-burning and inoffensive odor is unique in organic fertilizers.

SPILL CONTAINMENT/VEHICLE AND REMEDiation

Secondary Spill Containment

Contract Specialist: (817) 978-8377

Secondary spill containment for hazardous materials. Made of one-piece construction of XR-5 extruded vinyl. No inflation, assembly or disassembly is required. Units are portable and allow vehicle entry/exit. Can be used as decontamination basin, spill receptacle for leaking containers, tank truck containment, refueling or deicing of aircraft and for storage of fuel pillows, etc.

Quantity breaks are available. Call the contract specialist for information.

Secondary spill containment for hazardous materials. Made of one-piece construction. No inflation, assembly or disassembly is required. Units are portable and allow vehicle entry/exit. Resilient, crush-resistant foam fills 2" walls. Protects environmentally sensitive areas from contamination. Great for holding soiled refuse and waste materials at clean-up sites. Can be used as decontamination basin, spill receptacle for leaking containers, tank truck containment, refueling or deicing of aircraft and for storage of fuel pillows, etc. "AT" models are light guage, durable, easy-to-clean 12-mil PVC. "ERT" models are heavy guage, chemical resistant 30-mil PVC.

Quantity breaks are available. Call the contract specialist for information.

WATER CONSERVATION PRODUCTS

Urinals

Mister Miser

Contract Specialist: (817) 978-8377

Male urinal for residential, office, shop and small business use. Designed for water and space conservation, sanitation and aesthetics. Mister Miser uses only 10 oz of water to flush. Hides inside the wall and prevents "splash back." It comes with a built-in trap and a flush valve and requires only a 1-1/2" waste line and a 1/4" water feed line.

Waterless Urinal

Contract Specialist: (817) 978-8377

Absolutely no water connection, flushometer or backflow prevention necessary. Simple installation makes no-flush urinals especially adaptable for water-conserving retrofit applications. Urinals do not depend on minimum piping and water pressure requirements in order to be functional. Each odorless model comes with one EcoTrap and one quart of BlueSeal chemical.

Toilet Adapters

Dorsey Recovery System

Contract Specialist: (817) 978-8377

As retrofit toilets waste water, "Dorsey Recovery" recovers and recycles 1/2 to 1-1/2 gal of fresh water with every flush. It does not change the actual flush cycle, but recovers water previously totally wasted because of excessive water being forced down the overflow tube. Designed for common 3- to 5-gal toilets made prior to 1992. Saves money on water coming in, going out and water treatment.

Flushometer ADA Retrofit Handle for SLOAN Flushometers

Contract Specialist: (817) 978-8377

Controls and operating mechanisms are operable with one hand and do not require tight grasping, pinching or twisting to the wrist. The force required to activate controls is no greater than 5 lb. A.A.A.G.4.27.4 Law: Product Operation.

The retrofit handle satisfies ADA operating requirements with a simple handle-assembly changeout. Retrofits to any existing Royal or Regal Flushometer.

Low-Flow Shower Heads

Low-Flow, Massage Shower Head

Contract Specialist: (817) 978-8377

Shower head adjusts shower patterns from full stream to vibrating massage. The water-saving design operates on a low 2.5 gpm maximum flow at 80 psi. Meets ANSI Water Conservation Code A 112.18.1M. Available in two finishes: PT100C (chrome) and PT100B (brass). Sold only in cases of 24 each.

Model PT100C	
4510-01-431-9357	\$245.47
Model PT100B	
4510-01-431-9355	\$245.47

Low-Flow Shower Heads

Contract Specialist: (817) 978-8377

Shower head has a single orifice design. Operates at a flow rate of 2.5 gpm. Shower head has a chrome-plated finish and is molded from hydrolysis-resistant DuPont Delrin. Meets or exceeds all state and federal flow control standards. The 2001 models have a flow control valve that regulates massage action. The 2001-S models do not include this feature. The addition of "SS" indicates the model is vandal-resistant as well. The addition of "UNI" indicates a gravity/flow/low water pressure mode. Also available as Model NO WW-1 is a Water Conservation Kit. This kit contains Model 2001 as well as two aerators, installation instructions, printed materials, charts and various other water conservation aids. This kit is designed to retro-fit existing plumbing for water efficiency.

INDUSTRIAL BLAST EQUIPMENT

The Aqua Miser B.O.S.S.

Contract Specialist: (817) 978-8377

The Aqua Miser B.O.S.S. cleans, degreases and strips paint using simple baking soda and high-pressure water without prewashing or sanding. The adjustable water flow feature allows the operator to strip layer by layer or all at once. The unique rotating nozzle accessory greatly enhances the stripping power of the system. The B.O.S.S. will clean and strip any surface; metal, aluminum, stainless steel, fiber glass, wood, rubber and masonry without harming the surface. Will not harm bearings, valves or rotating equipment either. Baking soda is the most common cleaner and deodorizer in use today. It has a neutral PH balance and contains no hazardous chemicals, pollutants or dust of any kind and therefore is nonflammable and will not harm the environment or the operator. Available in two models, a plant supported electric or a fully portable diesel model. The electric model requires air, water and electricity. The diesel model only requires a water source. Both models consume approximately 3 gal per minute and can operate from a garden hose.

DUST FREE SANDING SYSTEMS

Dust Gone™ Vacuum Sanding Systems

Contract Specialist: (817) 978-8377

Dust Gone™ systems reduce sanding dust in your work environment by up to 99%. Dust Gone systems pay for themselves. Sandpaper last three times longer. Units use standard sandpaper and sanding attachments. An Air Force MEEP evaluation concluded that Dust Gone™ Systems are cheaper and more efficient than present equipment. Quantity pricing is available on procurements of 6 or more. Contact the contract specialist for more information.

SPILL RECOVERY**“Sea Slug” Bladders**

Contract Specialist: (817) 978-8377

Canflex Sea Slug ocean towable bladders are used for oil spill recovery and bulk liquid storage/transportation. All Sea Slugs are constructed using radio frequency welding machines. Auxiliary floatation is provided by high-quality, foldable, closed-cell, foam floatation panels that are welded along each side of the bladder. The streamline design and floatation allow the Sea Slugs to be used in ocean environments while filled with fluids including high-density weathered oils. Sea Slugs can also be used for emergency fluid storage on land.

PEST CONTROL/DETERRENT**Cat Claw Pigeon and Bird Control System**

Contract Specialist: (817) 978-8377

Cat Claw is made of stainless steel in a porcupine wire design. Cat Claw comes ready for installation and can be applied to various surfaces. Cat Claw has fewer prongs than competitive products and is more likely to create an effective inhospitable environment for birds. Excessive prongs can add support for landing or roosting. Cat Claw does not hurt birds and has been evaluated and approved by the Humane Society of the United States.
