MEMORANDUM

TO: Regional and District Superintendents
    Public and Nonpublic School Administrators
    Directors of Special Education

FROM: Joseph A. Spagnolo
      State Superintendent of Education

SUBJECT: Lists of Non-Toxic Art and Craft Materials

The Toxic Art Supplies in Schools Act (P.A. 84-725) prohibits the purchase of toxic art and craft materials for use in grades kindergarten through six. The Act further requires that art and craft materials containing toxic substances purchased for use by students in grades seven through twelve be labeled in accordance with Section 5 of the Act. In addition, federal law regarding non-toxic art supplies became effective November 18, 1990. (See 15 U.S.C. 1277.) The federal law closely resembles the Illinois Act.

In accordance with Sections 9 and 10 of the Toxic Arts Supplies in Schools Act, the Illinois Department of Public Health has provided us with lists of art and craft materials which can be used in grades kindergarten through six. The lists of non-toxic art and craft materials, which are published annually, are expanded as more art and craft materials are evaluated. This document replaces the July 1990 Lists of Toxic and Non-Toxic Art and Craft Materials.
This document contains the Illinois Department of Public Health approved:

(1) Lists of products labeled non-toxic, both acutely and chronically, developed by the Art and Craft Materials Institute, Inc. (ACMI).

(2) Lists of products certified to be properly labeled but which have a hazard associated with their misuse.

(3) A list of products which meet the “Exemption” criteria established by Section 8 of the Act which may be used in all grade levels.

If you have questions about these lists, contact the Illinois State Board of Education, 100 North First Street, Springfield, IL 62777, (217/782-5728).

PRODUCTS AUTHORIZED TO BEAR THE HL/CR HEALTH LABEL (CAUTIONS REQUIRED) SEAL OF THE CERTIFIED PRODUCTS AND CERTIFIED LABELING BUREAU OF THE ART & CRAFT MATERIALS INSTITUTE, INC. © 1994
100 Boylston Street, Suite 1050, Boston, MA 02116  617/426-6400

March 1994

Products bearing the Health Label (Cautions Required) Seal (HL/CR) of The Arts & Craft Materials Institute, Inc. (ACMI) are certified in a program of toxicological evaluation by a medical expert to be properly labeled. This program is reviewed by ACMI's Toxicological Advisory Board. These products are certified by ACMI to be labeled in accordance with the chronic hazard labeling standard, ASTM D-4236, and Federal law, P.L. 100-695. Products bearing the Health Label (Cautions Required) Seal bear appropriate ingredient and cautionary labeling and safe use instructions. Non-Toxic products with the Health Label (Non-Toxic) Seal bear the wording Non-Toxic or No Health Labeling Required and are located at the front of this list with the other non-toxic (CP and AP) products. Be sure to purchase products that bear the ACMI Seals!

TOXIC ART SUPPLIES IN SCHOOLS ACT
ILLINOIS REVISED STATUTES
September, 1985
TOXIC ART SUPPLIES IN SCHOOLS ACT

An Act in relation to schools and to amend an Act herein named P.A. 84-725, approved and eff. September 21, 1985.

1601. Short title

§1. This Act shall be known and may be cited as the Toxic Art Supplies in Schools Act.

1602. Legislative title

§2. The General Assembly finds that:

(a) Art supplies which contain toxic substances or which are potential human carcinogens pose a significant danger to the health and safety of school children.

(b) School children are not sufficiently protected by present health laws in so far as materials which may be seriously harmful are not so labeled, and therefore, children are not properly warned as to the dangers inherent in the use of those materials.

(c) Elementary school children should be protected by prohibiting the sale of art supplies containing toxic substances to schools and school districts for use in kindergarten and grades one through six, and art supplies containing toxic substances should be purchased by schools and school districts for students in grades seven through twelve only if the materials are properly labeled, as described in this Act.

1603. Definitions

§3. For the purpose of this Act, unless the context requires otherwise:

(a) Art or craft material means any raw or processed material or manufactured product marketed or being represented by the manufacturer or repackager as being suitable for use in the demonstration or the creation of any work or visual or graphic art in any medium. Such media may include, but need not be limited to, paintings, drawings, prints, sculpture, ceramics, enamels, jewelry, stained glass, plastic sculpture, photographs, and leather and textile goods.
(b) **Human carcinogen** means any substance listed as a human carcinogen by the International Agency for Research on Cancer or by the National Toxicology Program of the U.S. Department of Health and Human Services.

(c) **Potential human carcinogen** means one of the following:

1. any substance which does not meet the definition of human carcinogen, but for which there exists sufficient evidence of carcinogenicity in animals, as determined by the International Agency for Research on Cancer or the National Toxicology Program of the U.S. Department of Health and Human Services: or

2. any chemical shown to be changed by the human body into a human carcinogen.

(d) **Toxic substance** means any of the following:

1. human carcinogens;

2. potential human carcinogens;

3. any substance having a potential for causing a chronic adverse health effect as determined pursuant to ASTM Standard D 4236 of the American Society for Testing and Materials or latest revision.

For the purpose of this Act, an art or craft material shall be presumed to contain an ingredient which is a toxic substance if the ingredient, whether an intentional ingredient or an impurity, constitutes 1% or more by weight of the product.

(e) **Department** means the Illinois Department of Public Health.

1604. Material safety data sheets

§4. The Department of Labor shall supply Material Safety Data Sheets to the Department of Public Health, as requested, to assist in the determination of the presence of toxic substances in any art or craft material.
1605. Warning labels

§5. Warning labels for art or craft materials containing toxic substances shall meet all of the following standards:

(a) The warning label shall be affixed in a conspicuous place and shall contain the signal word WARNING to alert users of potential adverse health effects.

(b) The warning label shall contain information on the health related dangers of the art or craft material, as follows:

(1) If the product contains a human carcinogen, the warning shall contain the statement: CANCER HAZARD! Overexposure may create cancer risk.

(2) If the product contains a potential human carcinogen, and does not contain a human carcinogen, the warning shall contain the statement: POSSIBLE CANCER HAZARD! Overexposure might create cancer risk.

(3) The warning shall contain all of the following statements which apply:

(A) May cause sterility or damage to reproductive organs.

(B) May cause birth defects or harm to developing fetus.

(C) May be excreted in human milk causing harm to nursing infant.

(D) May cause central nervous system depression or injury.

(E) May cause numbness or weakness in the extremities.

(F) Overexposure may cause damage to (specific organ).

(G) Heating above (specify degrees) may cause hazardous decomposition products.
(4) If a product contains more than one toxic substance, or if a single substance can cause more than one health effect, the required statements may be combined into one warning statement.

(c) The warning label shall contain a list of ingredients which are toxic substances.

(d) The warning label shall contain a statement of safe use and storage instructions, conforming to the following. The label shall contain as many of the following risk statements as applicable:

1. Keep out of reach of children.
2. When using, do not eat, drink, or smoke.
3. Wash hands after use and before eating, drinking or smoking.
4. Keep container tightly closed.
5. Store in well-ventilated area.
6. Avoid contact with skin.
7. Wear protective clothing (specify type).
8. Wear NIOSH masks for dust, mists, or fumes.
9. Wear NIOSH-certified respirator with appropriate cartridge for (specify type).
10. Wear NIOSH-certified supplied-air respirator.
11. Use window exhaust fan to remove vapors and assure adequate ventilation (specify explosion-proof if necessary).
12. Use local exhaust hood (specify type).
13. Do not heat above (specify degrees) without adequate ventilation.
The warning label shall contain a statement on where to obtain more information, such as: *Call your local poison control center for more health information.*

The warning label, or any other label on the substance, shall contain the name and address of the manufacturer or repackager.

If all of the above information cannot fit on the package label, a package insert shall be required to convey all the necessary information to the consumer. In this event, the label shall contain a statement to refer to the package insert, such as *CAUTION: See package insert before use.* The language of the insert shall be nontechnical and nonpromotional in tone and content.

Art or craft material offered for sale in containers which contain less than one fluid ounce or one ounce net weight shall be deemed to comply with this Section if there is affixed thereon a precautionary label that includes the words *USE WITH CAUTION: Contains Toxic Substances,* and a list of potentially harmful or sensitizing ingredients.

An art or craft material shall be considered to be in compliance with the labeling requirements of this Act if the art or craft material complies with labeling standard D 4236 of the American Society for Testing and Materials (ASTM), or latest revision thereof unless the Department determines that the label on an art or craft material does not satisfy the purposes of this Act.

Nothing in this Act shall require or prohibit the labeling of any art or craft material containing toxic-substances prior to June 1, 1986.

1606. Purchase or order of toxic substances

§6. (a) Except as provided in Section 7 below, for the 1986-87 academic year and for each academic year thereafter, no art or craft material which is a toxic substance as defined in this Act, shall be ordered or purchased by any school or school district in Illinois for use in kindergarten or grades one through six, inclusive.
Commencing June 1, 1986, no toxic substance may be purchased or ordered by a school district for use by students in grades seven through twelve, unless it meets the labeling standards specified in this Act.

1607. Injunction

§7. The State Board of Education, in the name of the People of the State of Illinois, through the Attorney General of the State of Illinois, or through the State’s Attorney of any county in the State of Illinois, upon any complaint may apply for an injunction in the circuit court to enjoin any school or school district that has continued to use art supplies labeled as containing hazardous toxic substances after May 31, 1986; and upon the filing of a verified complaint in such court, the court, if satisfied by affidavit or otherwise, that the school or school district has been using such art supplies, may enter a temporary restraining order or preliminary injunction, without notice or bond, enjoining the defendant from further using such supplies. A copy of the verified complaint shall be served upon the defendant and the proceedings shall thereafter be conducted as in other civil cases. If it is established that the school or school district has been or is using such supplies after having been enjoined, the court may enter an order or judgment perpetually enjoining the defendant from further purchase of such supplies.

Such injunctural proceedings shall be in addition to, and not in lieu of, all penalties and other remedies provided in this Act.

1608. Exemptions

§8. If the Department finds that, because of toxic substances contained in art or craft material cannot be ingested, inhaled or otherwise absorbed into the body during any reasonable unforeseeable use of the product in such a manner as to pose a risk of adverse health effects, the Department may exempt the product from the requirements of this Act.

1609. Exclusion lists

§9. (a) The Department shall, by July 1, 1987, develop a list of those art or craft materials which can be purchased or ordered for use in kindergarten or grades one through six, and a list of materials which, while not currently sold or manufactured, may be reasonably suspected to still exist at some schools. In
developing the approved lists, the Department may, as a condition of placement on such list, demand, under appropriate provisions of confidentiality to protect a manufacturer's trade secrets, submission of such lists of ingredients and the results of tests, studies, findings and analysis as may be extant from manufacturers.

(b) The Department shall consider the findings and conclusions of a voluntary art and craft material certifying organization as to the appropriateness of placement of any product on the Department's art and craft materials approved list if:

(1) such voluntary certifying organization bases its findings and conclusions upon the findings of an independent certified toxicologist; and

(2) such voluntary certifying organization discloses to the Department the standards and procedures used by its certifying toxicologist for determining whether art and craft materials contain toxic substances causing chronic illness and if so, whether such substances can reasonably be expected to pose or not to pose a risk of adverse health effects. The Department may determine to add any product to such art and craft materials approved list for good cause. Such determination shall afford due consideration to uniform determinations by other state health departments or agencies and voluntary certifying organizations as specified above on this subject.

(c) The State Superintendent of Education shall distribute the lists to all school districts in Illinois and shall make the lists available to preschool, child care centers, and other businesses and organizations which involve children in the use of art or craft materials.

(d) The Superintendent shall inform school districts of the requirements of this Act, and shall encourage school districts to dispose of unnecessary art or craft materials which contain toxic substances.

Amended by P.A. 86-595, §4, eff. September 1, 1989.
16.10. Study

§10. By July 1, 1986, the Department shall complete a study of art and craft materials purchased for use by children in Illinois school districts to determine the extent of toxic substances in such materials and the scope of their use in school districts throughout the State.
WORLD-CLASS EDUCATION FOR THE 21ST CENTURY:
THE CHALLENGE AND THE VISION

VISION STATEMENT

As we approach the 21st century, there is broad-based agreement that the education we provide for our children will determine America’s future role in the community of nations, the character of our society, and the quality of our individual lives. Thus, education has become the most important responsibility of our nation and our state, with an imperative for bold new directions and renewed commitments.

To meet the global challenges this responsibility presents, the State of Illinois will provide the leadership necessary to guarantee access to a system of high-quality public education. This system will develop in all students the knowledge, understanding, skills and attitudes that will enable all residents to lead productive and fulfilling lives in a complex and changing society. All students will be provided appropriate and adequate opportunities to learn to:

- communicate with words, numbers, visual images, symbols and sounds;
- think analytically and creatively, and be able to solve problems to meet personal, social and academic needs;
- develop physical and emotional well-being;
- contribute as citizens in local, state, national and global communities;
- work independently and cooperatively in groups;
- understand and appreciate the diversity of our world and the interdependence of its peoples;
- contribute to the economic well-being of society; and
- continue to learn throughout their lives.

MISSION STATEMENT

The State Board of Education believes that the current educational system is not meeting the needs of the people of Illinois. Substantial change is needed to fulfill this responsibility. The State Board of Education will provide the leadership necessary to begin this process of change by committing to the following goals.

ILLINOIS GOALS

1. Each Illinois public school student will exhibit mastery of the learner outcomes defined in the State Goals for Learning, demonstrate the ability to solve problems and perform tasks requiring higher-order thinking skills, and be prepared to succeed in our diverse society and the global work force.

2. All people of Illinois will be literate, lifelong learners who are knowledgeable about the rights and responsibilities of citizenship and able to contribute to the social and economic well-being of our diverse, global society.

3. All Illinois public school students will be served by an education delivery system which focuses on student outcomes; promotes maximum flexibility for shared decision making at the local level; and has an accountability process which includes rewards, interventions and assistance for schools.

4. All Illinois public school students will have access to schools and classrooms with highly qualified and effective professionals who ensure that students achieve high levels of learning.

5. All Illinois public school students will attend schools which effectively use technology as a resource to support student learning and improve operational efficiency.

6. All Illinois public school students will attend schools which actively develop the support, involvement and commitment of their community by the establishment of partnerships and/or linkages to ensure the success of all students.

7. Every Illinois public school student will attend a school that is supported by an adequate, equitable, stable and predictable system of finance.

8. Each child in Illinois will receive the support services necessary to enter the public school system ready to learn and progress successfully through school. The public school system will serve as a leader in collaborative efforts among private and public agencies so that comprehensive and coordinated health, human and social services reach children and their families.

Developed by citizens of Illinois through a process supported by the Governor, the Illinois State Board of Education and the Illinois Business Roundtable.
Adopted as a resource for school improvement efforts
Printed by the authority of the State of Illinois.
