NORTH CAROLINA DEPARTMENT OF
ENVIRONMENT AND NATURAL RESOURCES
DIVISION OF POLLUTION PREVENTION AND
ENVIRONMENTAL ASSISTANCE

James B. Hunt Jr., Governor
Bill Holman, Secretary, DENR
Gary E. Hunt, Director, DPPEA

ACKNOWLEDGEMENTS

The Division of Pollution Prevention and Environmental Assistance (DPPEA) expresses its appreciation to those who participated in this project. John Blaisdell had primary responsibility for administering the project and conducting market research, data collection and compilation, and database revisions. Guidance and assistance were provided by DPPEA staff of the North Carolina Department of Environment and Natural Resources.

DIVISION OF POLLUTION PREVENTION AND ENVIRONMENTAL ASSISTANCE

Gary Hunt, Director
Scott Mouw, Chief, Community and Business Section
Matt Ewadinger, Manager, Recycling Business Assistance Center
John Blaisdell, Market Development Specialist
Sharon Gladwell, Communications Specialist
Elizabeth Reid, Communications Assistant

Additional thanks to the entire staff for contributing contact names and leads and to John Nelms, Jason Hale, and O.C. Melton for the many telephone calls to businesses.

About the Division of Pollution Prevention and Environmental Assistance

The Division of Pollution Prevention and Environmental Assistance (DPPEA) of the North Carolina Department of Environment and Natural Resources provides free, non-regulatory technical assistance and training to North Carolina businesses, local governments, state agencies, and citizens on methods to eliminate, reduce, or recycle wastes before they become pollutants or require disposal.

INTRODUCTION

Recycling has become an efficient, cost-effective waste management strategy for more and more North Carolina governments, businesses, and individuals. Recycling benefits the environment, saves disposal fees, helps avoid regulatory oversight, and can generate revenues for many companies and individuals. Current information indicates that even more recycling would occur if generators knew about and had easy access to markets for their recyclables.

To facilitate recycling efforts, the North Carolina Division of Pollution Prevention and Environmental Assistance (DPPEA) is pleased to present this sixth edition of the *Directory of Markets for Recyclable Materials*. DPPEA also maintains the Web site <http://www.p2pays.org/DMRM/>, which is a continuously updated, fully searchable Web-based version of the Directory. The Directory provides the essential link between businesses, industries, and local governments searching for markets for their recyclables and the companies that accept the materials for reprocessing and reuse. By facilitating market access, the Directory will assist North Carolina in meeting its solid waste reduction goals and pollution prevention efforts. Please contact DPPEA for the latest information available.

The North Carolina Recycling Business Assistance Center (RBAC), a program of the Department of Environment and Natural Resources (DENR) in conjunction with the Department of Commerce (DOC), is the state's lead agency for providing technical and business development assistance to recycling companies. Through its staff and an array of partnerships with other business assistance and technology development agencies, RBAC can help companies with questions ranging from the sourcing of materials to business planning and financing. New and existing recycling companies in North Carolina as well as out-of-state companies considering locating in North Carolina are encouraged to call RBAC at (919) 715-6500.

DPPEA makes every effort to provide current and accurate information on recycling markets serving North Carolina; however, markets for recyclable materials are expanding rapidly. To help provide up-to-date market information, DPPEA requests that Directory users send additional information for new recycling markets, expanded capacity at existing facilities, and/or updated information on existing markets. We thank you for your assistance in keeping the Directory and database current.

The Directory identifies industrial and commercial recyclers in North Carolina and adjacent states by business name, location, and materials accepted. An industrial and commercial recycler is defined as "any individual or company that accepts recyclable materials from governmental agencies, businesses, non-profit organizations, and/or individuals." This broad definition includes brokers, handlers, processors, end-users, exporters, fuel-blenders, and burners. Terms used to categorize the companies listed in this Directory are defined below.

DEFINITIONS

Broker:	An agent or firm that locates markets for recyclable materials and carries out the associated business transactions.
Burner:	A company that reuses a waste material for fuel (e.g., waste-to-energy, tire-derived fuel, or refuse-derived fuel).
End User:	A company that incorporates recycled materials into products it uses and/or manufactures.
Exporter:	A company that sells recyclable materials to markets outside the United States.
Fuel Blender:	A company that blends waste materials into new fuels for use by burners.
Handler/Collector:	A company that collects and/or recovers recyclable materials directly from individuals or companies.
Processor:	A company or firm that processes recyclable materials to meet specifications required by end users.

HOW TO USE THIS DIRECTORY

This directory is divided into two sections:

Section I: Recyclable Materials Index lists specific recyclable materials accepted by individual recycler(s). The following 13 major recyclable material categories are listed alphabetically:

- Biomass/Wood
- Chemical
- Construction and Demolition Materials
- Electronics
- Food
- Glass
- Metal
- Paper
- Petroleum
- Plastic
- Rubber
- Textiles
- Miscellaneous

Within these major material categories, recyclers of a specific material type follow alphabetical listings of recyclable materials. For example, recyclers of Cardboard are listed by state and city. Users can search this index for a specific material and identify a recycler that serves a specific area.

Section II: Markets for Recyclable Materials is an alphabetical listing of industrial and commercial recyclers that includes business name, address, contacts, type of business, geographical service area, materials accepted (with specific requirements for each material in parentheses where applicable), and general requirements for all materials.

To locate a specific recyclable material, follow these steps:

Step 1: Determine the major category for the material. The category for many materials is obvious; for example, aluminum cans are listed under Metal. In cases where materials could be listed in two or more major categories, cross-references are provided.

To aid the user in locating them in the Recyclable Materials Index, below are examples of materials and their major category. For additional references, see the entire listing of materials by major category.

RECYCLABLE MATERIAL	MAJOR CATEGORY
Ink	Chemical
Paint Waste	Chemical
Appliances	Metal
Yard Waste	Biomass
Oil	Petroleum
Textile Dyestuffs	Chemical
Coolants (see Machining Coolants)	Chemical
Cartridges, Laser	Miscellaneous

Step 2: Turn to the major category of interest in Section I, Recyclable Materials Index, and search the alphabetical list for the specific material.

Step 3: Skim the specific material listing by state and city for the nearest recycler.

Step 4: Once a recycler has been identified, turn to Section II, Markets for Recyclable Materials, and locate the full information on the company that handles the material.

ADDITIONAL RESOURCES

This directory is not a comprehensive listing of recycling businesses serving North Carolina. For further assistance, please note the references listed below:

INFORMATION CLEARINGHOUSES/WASTE EXCHANGES:

A number of industrial waste exchanges provide information clearinghouses that allow companies to publicize their waste streams to encourage reuse. A listing of the national material exchanges can be found on the Kentucky Industrial Materials Exchange Web site: <http://www.enviroworld.com/Resources/matexchs.html>

WasteWatcher, published by the Southeast Waste Exchange, in Charlotte, North Carolina, is a bi-monthly catalog that lists both *generators* of by-products and surplus materials and *businesses that accept* such materials.

A number of sites on the World Wide Web also furnish useful recycling market information; some offer exchange services as well or provide links to other important Web sites. The listing below shows the Internet address for a number of these sites:

DIRECTORY OF MARKETS FOR RECYCLABLE MATERIALS

Contact Questionnaire

The Contact Questionnaire used to gather information about companies and the recyclable materials they handle appears on the following pages.

This Directory is useful to the extent that the information it contains was current and correct at the time of printing. The fully searchable on-line version of the directory, available at <http://www.p2pays.org/DMRM>, is continuously updated. The Division of Pollution Prevention and Environmental Assistance solicits the cooperation of users and readers and requests updates, corrections, and additions to the listings. Please use copies of the Contact Questionnaire to add a company to the Directory or to add/delete information. You may contact DPPEA at:

NC DIRECTORY OF MARKETS FOR RECYCLABLE MATERIALS

QUESTIONNAIRE

Instructions:

1. This questionnaire has two parts: 1) a general company information form, and 2) a material listing form specifying which materials your company accepts.
2. Please fill out each part as completely as you can. This information will form the basis of how your company is listed in the Markets Directory, and it is important that the information be accurate and complete.
3. The material listing form (Part II) is a coded list of materials designed to eliminate vague and repetitious categories of materials. Simply check the boxes of the materials you accept.
4. If you have *specific* requirements for any of the materials you accept (for example, "materials must be baled"), you may indicate those requirements in one of three ways: 1) write the requirement in the space next to its listing, 2) write the code and the specific requirement in the space provided on Page 2 of the materials list, or 3) attach a separate sheet indicating specific requirements for any of the materials you accept. Please note that you can also list any *general* requirements in Question 10 below on Part I.
5. If you accept a material that is not on the list, enter a description of the materials at the bottom on the material listing form (Part II) or on a separate sheet of paper attached and returned with the questionnaire.
6. After completing the questionnaire, please return it to:

ATTN: JOHN S. BLAISDELL, NC DPPEA
1639 MAIL SERVICE CENTER, RALEIGH, NC 27699-1639
or Fax: (919) 715-6794

7. If you have any questions, please call (919) 715-6500 or e-mail: dmmr@p2pays.org

Part I: GENERAL INFORMATION

1. Company Name _____
Mailing Address _____
City _____ State _____
Zip+4 _____ - _____ County _____
Physical Address _____
City _____ State _____
Zip+4 _____ - _____ County _____
2. Please identify who in your company should be listed in the Directory as the contact(s) for recycling information and related matters:
Name _____ Title _____
Phone _____ Fax _____
Name _____ Title _____
Phone _____ Fax _____
E-mail Address 1 _____
E-mail Address 2 _____
Company Web Site Address _____
3. Is your company a branch, division, or subsidiary of another company? Yes No
If yes, please provide name of other company _____

(continued on reverse)

4. Does your company operate regional recycling processing centers serving North Carolina and the southeastern region? Yes No *If yes, please attach or mail a list with details.*
5. Does your company operate local collection stations for recyclable materials in North Carolina? Yes No *If yes, please attach or mail a list with details.*
6. Please indicate the type of business your company operates (please check all that apply). Definitions of business types have been included to assist you with this question.
- BROKER: an agent or firm that locates markets for recyclable materials and carries out the associated business transactions.
 - HANDLER/COLLECTOR: a company that physically collects and/or recovers recyclable materials directly from individuals or companies.
 - PROCESSOR: a company that processes recyclable materials to meet the specifications required by end users.
 - END USER: a company that incorporates recycled materials into products it uses and/or manufactures.
 - EXPORTER: a company that is currently or has in the past exported recyclable material.
 - BURNER: a company that reuses a substance/material for fuel (waste-to-energy, tire-derived fuel, or refuse-derived fuel).
 - FUEL BLENDER: a company that blends used substances into new fuels for use by burners.
 - OTHER (please explain): _____

7. Does your company provide on-site services for generators of waste materials (e.g., establishing an internal collection system, filtering antifreeze and leaving it onsite, etc.) Yes No
8. Please define your company's service area by checking the *most appropriate* responses (more than one may apply):
- International North Carolina (entire state)
 - United States Eastern North Carolina (Coastal Plain)
 - Eastern U.S. (East of Mississippi) Central North Carolina (Piedmont)
 - East Coast (Atlantic Seaboard States) Western North Carolina (Mountains)
 - Southeastern United States Local Only (please specify county below if in NC, SC, TN or VA) _____
9. Please provide any additional information about your company (e.g., hours of operation, year established, applicable permits, etc.) _____

10. Does your company have any general requirements for all materials (e.g., company requires material samples, company does not accept materials from individuals, company accepts in bulk or drum, etc.)? If so, please explain:

11. Would you like to receive a paper copy of the directory? Yes No
The Directory of Markets for Recyclable Materials is now a fully searchable, continuously updated Web site:
