# Introduction

In 1993, the Florida Department of Environmental Protection's (FDEP) Division of Waste Management, Bureau of Solid and Hazardous Waste Management, Solid Waste Section in Tallahassee, Florida contracted for the completion of a **Directory of Florida Dealer/Processors and Industrial Users of Recyclable Materials in Alabama, Florida, Georgia and Mississippi** (the Directory). Dealer/processor is defined as a company that accepts or processes recovered materials for the purpose of resale. Industrial users are usually a manufacture that accepts recovered materials for the purpose of making a product.

In 1999, the FDEP partnered with the Southern Waste Information Exchange, Inc. (SWIX) to update this publication. SWIX has changed the format of the Directory to include:

- Two major sections:

The first section lists Dealer/Processors for all four States by material by company name. Following this listing is a complete alphabetical listing of Dealer/Processors. This section also lists Services (e.g., container rental, pickup services, etc.) that may be provided by each company listed.

The second section lists Industrial Users for all four States by material by company name. Following this listing is a complete alphabetical listing of Industrial Users.

- The materials accepted in both sections now include the 13 categories of materials used by the FDEP for Recycler Certification in Florida. These materials include:

ONP	old newspapers
OCC	old corrugated containers
HG	high grades/office paper
MP	mixed paper
PB	plastic bottles
OP	all other plastic
ALC	aluminum cans
ONF	other non-ferrous
SC	steel cans
OF	other ferrous
GL	glass containers
RU	rubber (not including tires)
TX	textiles

The general types of support services offered by each dealer/processor are coded as follows:

PU	pickup service
CN	container rental/lease/sales
EQ	equipment rental/lease/sales
CS	consulting Services
BR	brokerage

# Directory Update Methodology

The Southern Waste Information Exchange, Inc. (SWIX) used the 1993 Directory as a base to begin contacting companies in order to update names, addresses, phone numbers, contact names, and recyclable materials handled.

SWIX also contacted appropriate State agency representatives in each State covered by this Directory (i.e., Florida, Georgia, Alabama, and Mississippi) to obtain any updated and current directories of dealer/processors and industrial users in their respective jurisdictions.

After receiving updated dealer/processor and industrial user database materials from each State, SWIX performed a telephone survey (limited mostly to listings from the States of Mississippi and Alabama which did not have updated company contacts information) to determine the appropriate person contact for each company listed in the 1993 Directory and in updated recycler directories obtained by SWIX from each State.

Though SWIX has included Dealer/Processors and Industrial Users from Florida, Georgia, Alabama, and Mississippi, there are some companies listed in this directory that are from outside one of these states. This is a result of the listed company providing services in one of the targeted states.

Finally, SWIX performed a fax survey of all companies (both Dealer/Processors and Industrial Users) listed in this updated directory. These fax surveys are attached as Appendix A to this Directory.

## Listing

In the event your company is not listed in this directory and would like to be included, we have provided a form on page 6 to do so. Submission information is on the form.

## Disclaimer

The inclusion of a company's name in this directory does not indicate current compliance with environmental regulations or current operating and services provided status. Further, appearance of a company in this directory does not constitute approval or disapproval by the regulatory agencies of each State covered by this publication.
