Welcome to the Carolina Composting and Organics Recycling Council's Carolina Composting and Resource Guide!

This updated guide is intended to help you locate compost, mulch, and other types of recycled organic materials in North and South Carolina. The increase in the number of yard waste facilities operating few years—mostly owned and operated by the public sector—is a clear response to the 1993 landfill bans on yard waste in the both states. Although most material was given away or sold, 38 percent of the yard trimmings processed was stockpiled on site, unused.

In producing this guide, CCORC hopes to encourage the use of recycled organic products by explaining where they are available and aid in developing a demand for these products. We do not endorse any particular producer in this book. Individuals should contact the producer directly concerning materials.

All North and South Carolina recycled organics producers have the opportunity to enter their product in this guide free of charge. If you would like to be on our mailing list, or would like to find out more about CCORC, please get in touch with us -- we'd love to hear from you.

**The Carolina Composting and Organics Recycling
Council (CCORC)** is a council of the Carolina Recycling Association.

Our mission is to promote composting and organics recycling and to support beneficial uses of the end products by public entities, private companies, and residents.

If you have feedback regarding this *Carolina Composting and Resource Guide*, would like to be included in the next edition free of charge contact:

CCORC
Carolina Recycling Association
7330 Chapel Hill Road, Suite 207
Raleigh, NC 27607
tel: 919-851-8444 fax: 919-851-6009
e-mail: NCRecycles@aol.com
web: [http:// www.recycle.net/recycle/ncra/](http://www.recycle.net/recycle/ncra/)

This publication came about with the help of the CCORC Steering Committee, Carolina Recycling Association, NC DENR - Division of Pollution Prevention and Environmental Assistance, and SC DHEC - Office of Waste Reduction and Recycling.

1000 copies of this guide were printed at a cost of \$1.30 each.

What's In This Guide? Each company and municipality listed in this guide completed the same form, but some listings are more thorough than others.

Products

Compost: Recycled organic product in which the feedstock(s) has undergone biological degradation, a process characterized by elevated temperatures in the range of 120° to 160°F. The product no longer resembles the feedstock(s) from which it was produced. *Examples:* yard waste compost, biosolids compost, manure compost.

Mulch: Recycled organic product derived from physical/mechanical processing of the feedstock(s) into a fairly uniform particle size. The product does not undergo significant biological decomposition, does not resemble soil in appearance, and typically still resembles the feedstocks from which it was derived. *Examples:* wood chips, pine bark mulch, chipped brush.

Liming Material: Recycled organic product that is derived from and/or mixed with an alkaline material capable of neutralizing soil acidity. The product is either registered with the NCDA as a liming agent or product analyses are available to consistently demonstrate its effectiveness as a liming agent. *Example:* alkaline stabilized biosolids.

Fertilizer: Recycled organic product which consistently contains one or more essential plant nutrients. It is either registered with the NCDA as a fertilizer or product analyses are available to demonstrate the claimed plant nutrient content. *Example:* granulated/pelletized biosolid.

Other: Recycled organic product that does not fall into any of the categories. (Producers were asked to describe the product).

Feedstocks

Agriculture materials: Includes straw, bedding, crop residue, processing wastes from slaughterhouse, fish/shellfish processing.

Animal manures & wastes: Includes cow, pig, horse, and poultry manures, fish, crab and poultry processing waste.

Biosolids: Wastewater solids that have been processed until they are suitable for beneficial use.

Food materials: Fruit and vegetable peelings, damaged or spoiled produce, old bread, bakery items, used coffee grounds, egg shells.

Industrial organic materials: Non-food organics such as cotton fibers/cloth, wood shavings, sawdust, wood brewery waste, paper pulp, tobacco sweepings, pharmaceutical wastes.

Mixed municipal solid waste: Commingled residential and/or commercial refuse.

Paper products: Separated/recycled newsprint and other waste paper products such as paperboard.

Silviculture & yard materials: Includes bark, woodchips, leaves, grass clippings, brush, small tree limbs, and stumps.

Other: (Producers were asked to describe).

Additional Product Information

Here are the actual questions we asked producers:

1. Are samples of your product available upon request?
 2. Do you provide instructions on product application?
 3. Can you provide physical analysis data for your product upon request? (particle size distribution, moisture content, porosity, etc.)
 4. Can you provide chemical analysis data on your product upon request? (pH, soluble salts, calcium carbonate equivalency, N-P-K content, etc.)
 5. Is the product screened? Approximate particle size:
-

BROOKS CONTRACTOR

Serving the Piedmont and surrounding areas as the original manufacturer of premium **EGGSHELL COMPOST**.

Totally organic, no sludge or ash used.

FOR ALL YOUR LANDSCAPING & GARDENING NEEDS

ALSO AVAILABLE:

pine bark fines
amended topsoil
greenhouse mixes
mulch and bark

delivered to your site by company owned trucks

Compost Use Estimator

Conversion Factors: One cubic yard = 27 cubic feet;
One square yard = 9 square feet

<u>Depth of Compost</u>	<u>Quantity Needed to Cover</u>	
	<u>1,000 Square Ft.</u>	<u>One Acre</u>
1/4"	0.75 cu.yds.	34 cu.yds.
1/2"	1.5 cu.yds.	67 cu.yds.
1"	3.0 cu.yds.	134 cu.yds.
1 1/2"	4.5 cu.yds.	201 cu.yds.
2"	6.0 cu.yds.	269 cu.yds.
2 1/2"	7.5 cu.yds.	335 cu.yds.
3"	9.0 cu.yds.	402 cu.yds.

Cubic Yards of Compost Required to Cover a
Specific Area Formula:

$$\begin{array}{l} \text{Area to cover} \\ \text{(in square feet)} \end{array} \times \begin{array}{l} \text{Compost} \\ \text{(in depth in inches)} \end{array} \times 0.0031 = \begin{array}{l} \text{Equals cubic yards} \\ \text{of compost needed} \end{array}$$

Example: Determine the amount of compost necessary to cover 5,000 ft²
with a 1/2" layer of compost:

$$(5,000 \text{ ft}^2) \times (0.5 \text{ inches of depth}) \times (0.0031) = 7.75 \text{ yd}^3$$

Compost Stability Indices

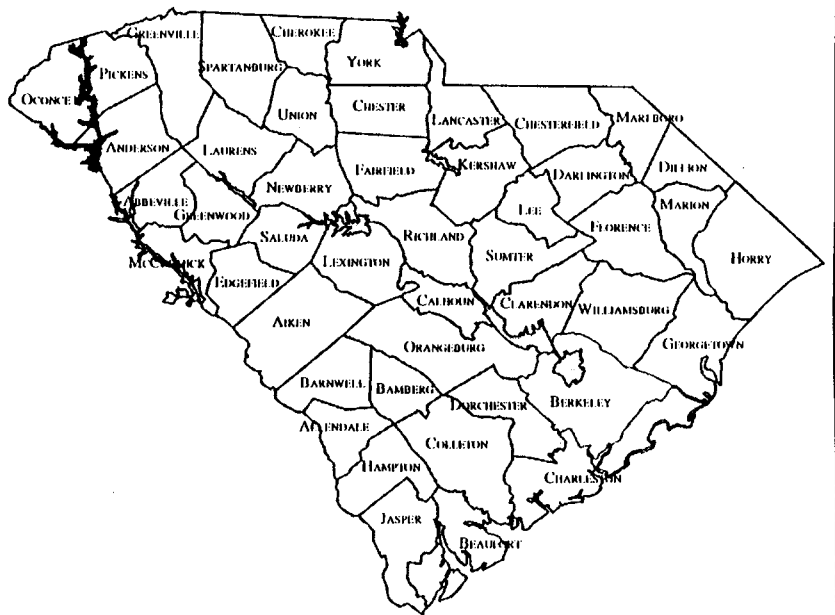

Respiration Rate*	Rating	Characteristics
< 2.0	Very Stable	Well-cured compost No odors No continued decomposition No potential for phytotoxicity
2.0-5.0	Stable	Cured compost Odor production not likely Limited potential for phytotoxicity Minimal impact on soil carbon and nitrogen dynamics
5.0-10.0	Moderately Unstable	Uncured compost Minimal odor production High potential for phytotoxicity Addition to soil may result in nitrogen immobilization Not recommended for growing plants from seed
10.0-20.0	Unstable Compost	Uncured compost Odor production likely Very high potential for phytotoxicity Addition to soil results in nitrogen immobilization Not recommended for growing plants from seed
> 20.0	Unstabilized material	Extremely unstable material Odor production Phytotoxicity expected Nitrogen immobilization in soil Not recommended for use

* (mg CO₂-C/ g Vol. Solids/day)

Information:** (not reported)

Bertie County, NC
Fertilizer

Organic Litter Gro, Inc.

Brent Daniels	President
436 Capehart Church Road	Phone: 252-356-2001
Merry Hill, NC 27957	Fax: 252-356-2004

Product Information:

Product Name: **Environment's Request Natural Fertilizer and Natural Oil Vanish**

Feedstocks: Mixed municipal solid waste
Animal manures & wastes
Agricultural materials
Industrial organic materials

Does the facility supply:	Product samples:	Yes
	Physical analysis data:	Yes
	Chemical analysis data:	Yes
	Is the product screened?	Yes
	Size:	1/16" to 1/8"

Instructions for application: Yes

How is the product available? Bulk & Bagged

Yearly quantity available: Environment's request - 6,500 tons,
Natural Oil - 6,000 tons

Delivery Info: Delivery service available & Loading service provided

Other Information: Environment's Request is sold pelletized, screened & unscreened. Oil Vanish contains natural ingredients which eat oil & other contaminants out of the soil and fertilizes the same time.

Carteret County, NC
Fertilizer

Atlantic Organic Fertilizer Co.

Yona Owens	President
PO Box 336	Phone: 919-781-6933
Beaufort, NC 28516-0336	Fax: (not reported)

Product Information:

Product Name: **Chanteyman Brand 8-4-0.5 Dry Fishmeal Fertilizer**

Feedstocks: Animal manures & wastes

Does the facility supply:

Product samples: Yes
Physical analysis data: Yes
Chemical analysis data: Yes
Is the product screened? Yes
Size: powder

Instructions for application: Yes

How is the product available?

Bagged

Yearly quantity available: 5 tons

Delivery Info: Call to arrange

Other Information: This product has not been on the market since 1976 until now. The word Menhaden (the name of the fish from which the meal is made) means fertilizer in several Native American languages.

Catawba County, NC
Compost

Regional Compost Facility

Wayne Carroll
3200 20th Avenue S.E.
Newton, NC 28658

Project Manager
Phone: 828-465-1401
Fax: 828-465-4115

Product Information:

Product Name: **Catawba ORGRO**

Feedstocks: Biosolids

**Does the
facility
supply:**

Product samples: Yes
Physical analysis data: Yes
Chemical analysis data: Yes
Is the product screened? No
Size: less than 1/2"

Instructions for application: Yes

**How is the product
available?**

Bulk

**Yearly quantity
available:** 25,000 cubic yards

Delivery Info: Call to arrange

**Other
Information:** ORGRO should not be applied within 10 feet
of any water supply or flooded or frozen
ground.

Chatham County, NC
Compost

Brooks Contractor

Dean Brooks
1195 Beal Rd
Goldston, NC 27252

Vice-President
Phone: 919-837-5914
Fax: (not reported)

Product Information:

Product Name: **(none reported)**

Feedstocks: Agricultural materials
Animal manures & wastes
Food materials, Paper products
Industrial organic materials
Silviculture & yard materials

Does the facility supply: Product samples: Yes
Physical analysis data: Yes
Chemical analysis data: Yes
Is the product screened? Yes
Size: 1/2"

Instructions for application: Yes

How is the product available? Bulk

Yearly quantity available: 50,000 cubic yards

Delivery Info: Delivery service available & Loading service provided

Other Information: Totally organic high grade egg shell compost, some liming effect, no sludge or ash used.

Biocorp reSourceBags™ are now recognized across North America as the first choice in yard debris and food scrap composting. They are the only commercially available, 100% compostable/biodegradable plastic bags on the market. **Biocorp reSourceBags™**, which contain no polyethylene, can biodegrade in less than 35 days in a compost site.

reSourceBags™ are a better choice for Yard Debris Composting ...

Biocorp reSourceBags™ Versus

Paper bags

Compact- easy to store
Transparent- allows visual control to
avoid contamination
Resistant to water- rain, snow & wet
waste
Biodegrade in less than 35 days
Renewable resource- corn starch

Bulky- needs more storage space
Opaque- no control of contamination
Non-resistant to water or snow-
Additional bags needed
Biodegrade in 55 days
Made of Timber- it takes 20 years to
grow a tree

Now residents can prefer plastic with no shame!

Biocorp reSourceBags™ and reSourceWare™ are gaining a reputation as the only choice for institutional and home food scrap collection. **Biocorp** produces a full line of 100% compostable/biodegradable plastic bags and liners which provide a labor saving, odor-free and hygienic solution to the collection, transportation and disposal of food scraps/residuals. **reSourceWare™** cutlery provides all the convenience of disposables without the hassle of hand and mechanical separation of these items before or after composting. Let us help you design a food scrap-recycling program that meets your needs.

Available also, a full line of food service items: hot and cold cups, lids, straws and plates!
Biocorp products are truly environmentally friendly!
