

## Objectives of the German Network on LCI Data

- the scientific validation, generation and **continuous update** of data for life cycle analyses
- the use of life cycle data for scientific **decision support** with respect to sustainable production and consumption in varying application areas
- further **methodological development** of life cycle analyses within the research area material flows and sustainability.
- **Integration in international activities**

## Inputs into the the Network

1. Guidelines for data capturing (**WG Methodology**): documentation and specification of quality criteria.
2. Review of data sets (**WGs data supply**): internal review on quality but also quantification of DQIs.
3. User needs (**WGs application fields**): definition of appropriate data set properties and rule based filters which also have to encounter DQIs.

## Proceedings for common findings

- Summary of work shop outcomes to be prepared by session moderators: answers found to overarching and session-specific questions; open issues; lessons learned (e.g. on form of workshop etc.)
- Selected, reworked and reviewed papers framing the workshop outcome summary
- Form of publication: intended to be under UNEP/SETAC

## Follow-up events for contentious issues

- Upcoming workshops
- Other addressees
- Targeted projects
- Input to the work programme of UNEP/SETAC Initiative, LCI programme, TF1-5

Presentations will be available online after the workshop
